Articolazione coxo-femorale

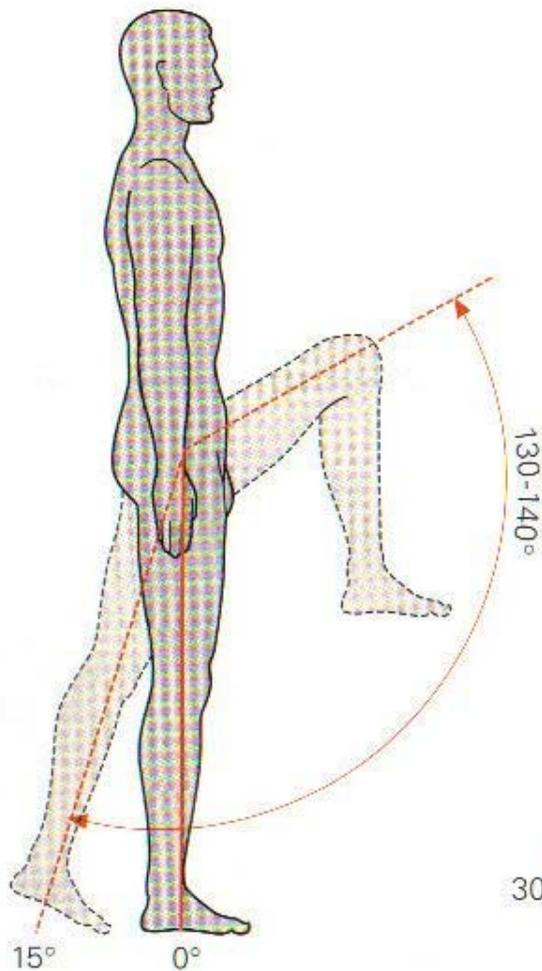

ENARTROSI

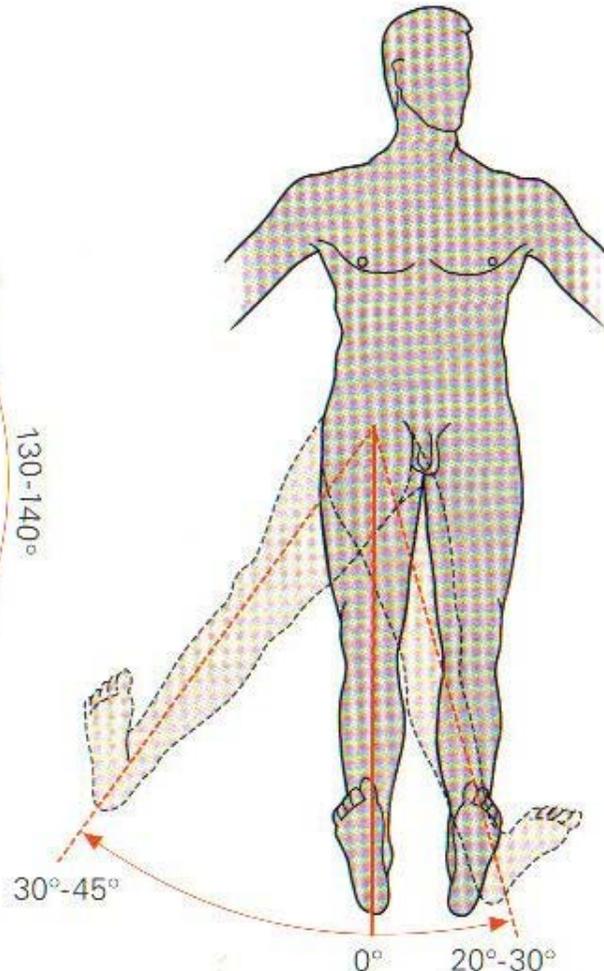

Articolazione coxo-femorale

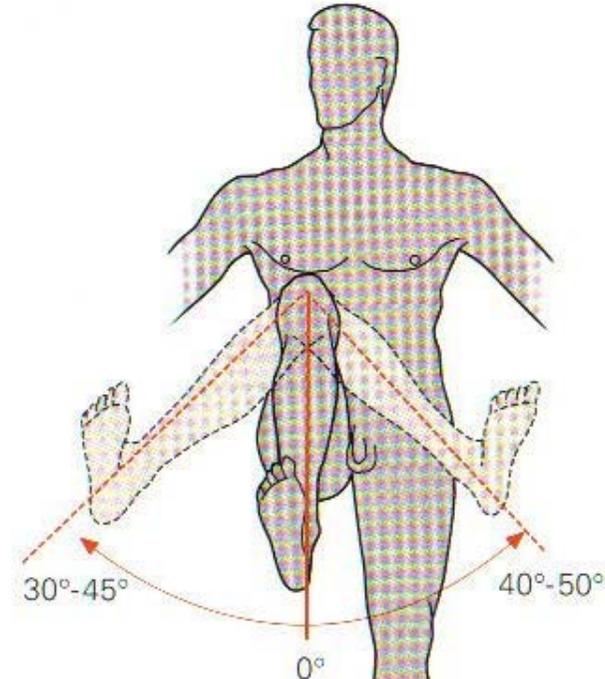

Mobilità

Flessione ed estensione

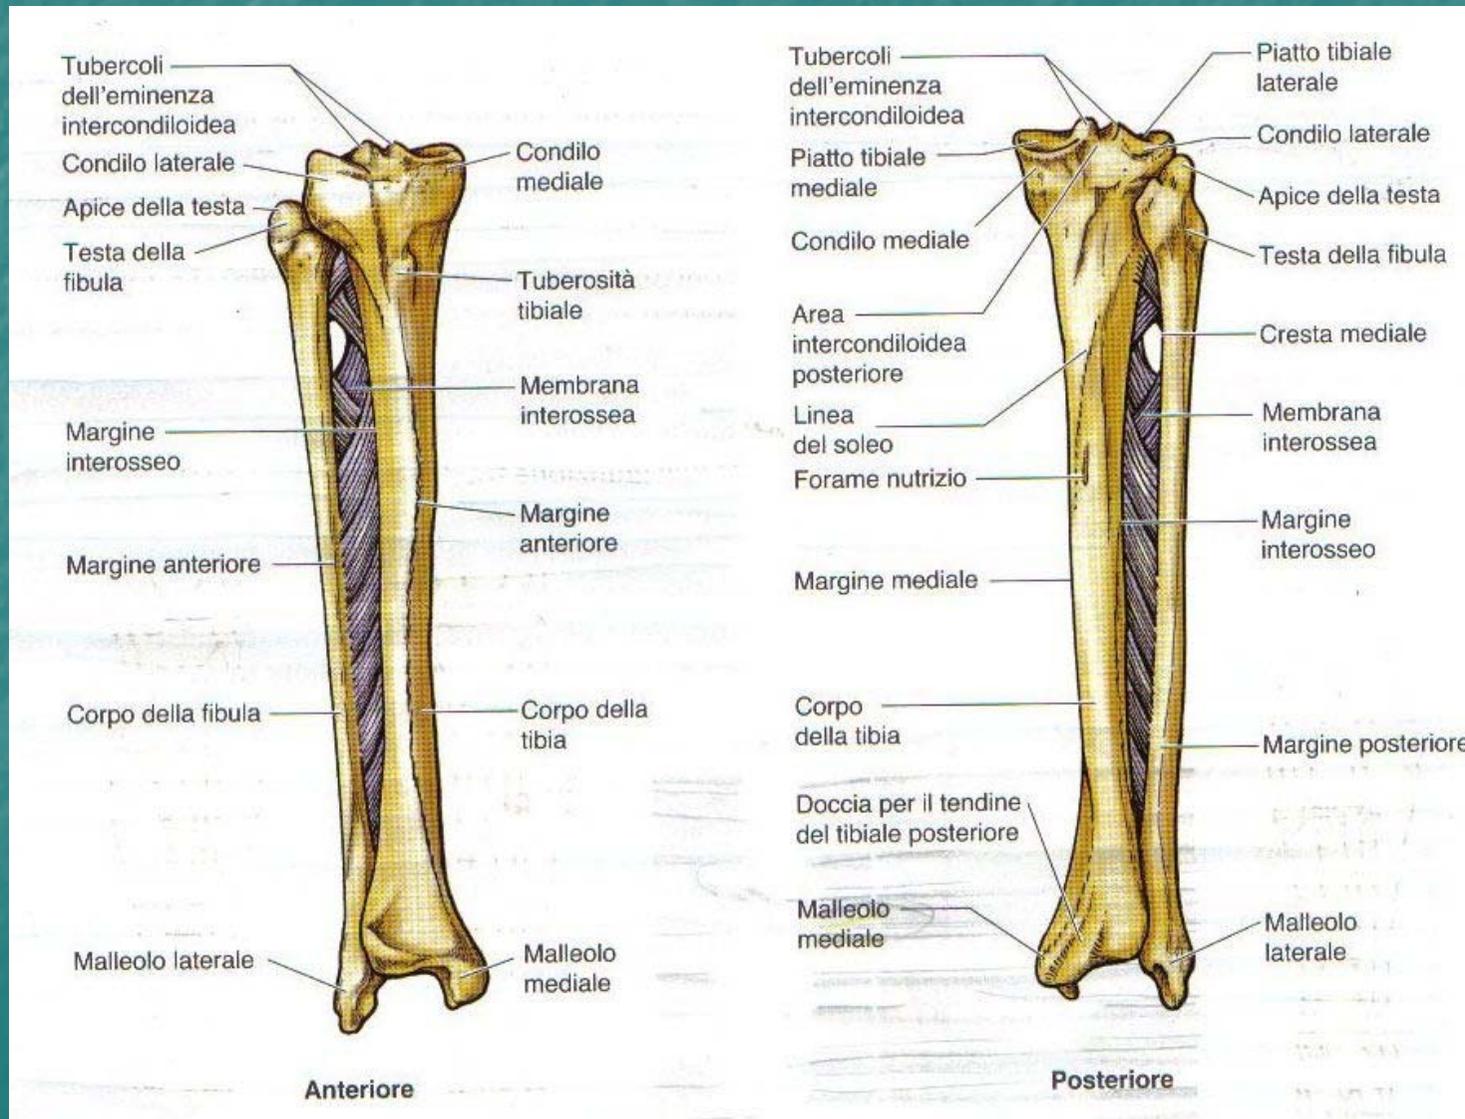

Abduzione e adduzione

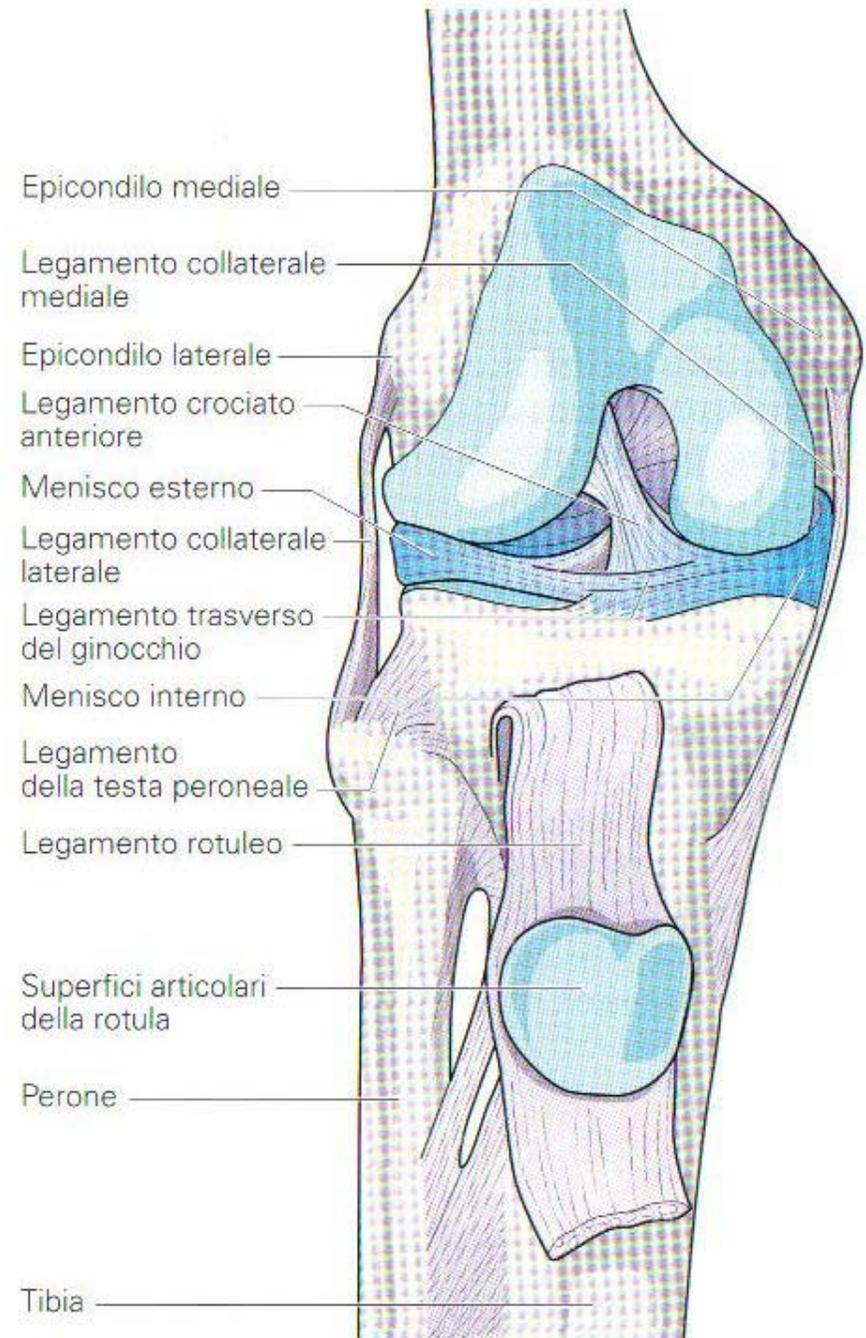

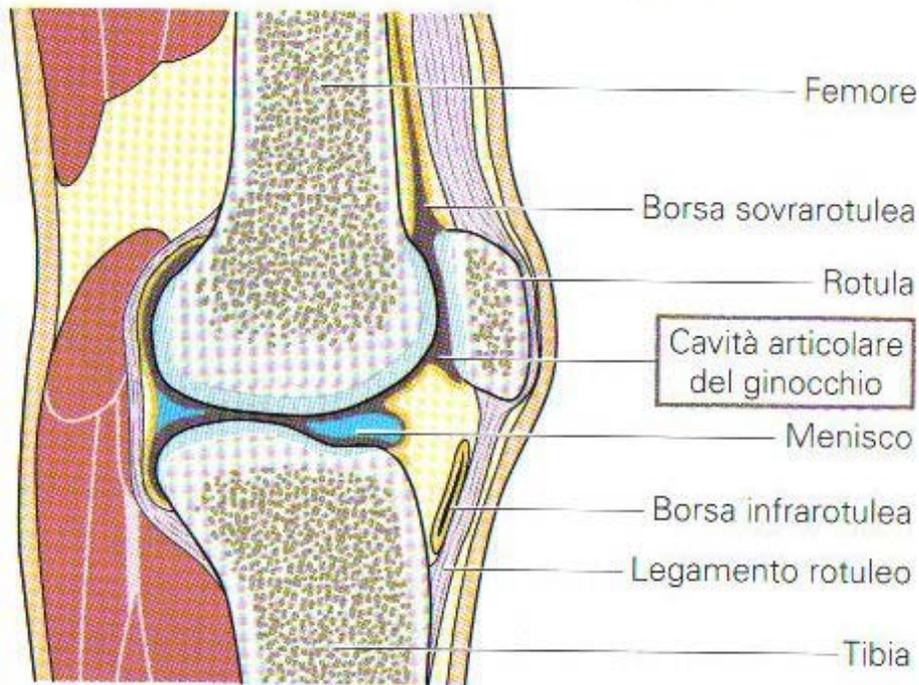

Rotazione

Tibia e perone

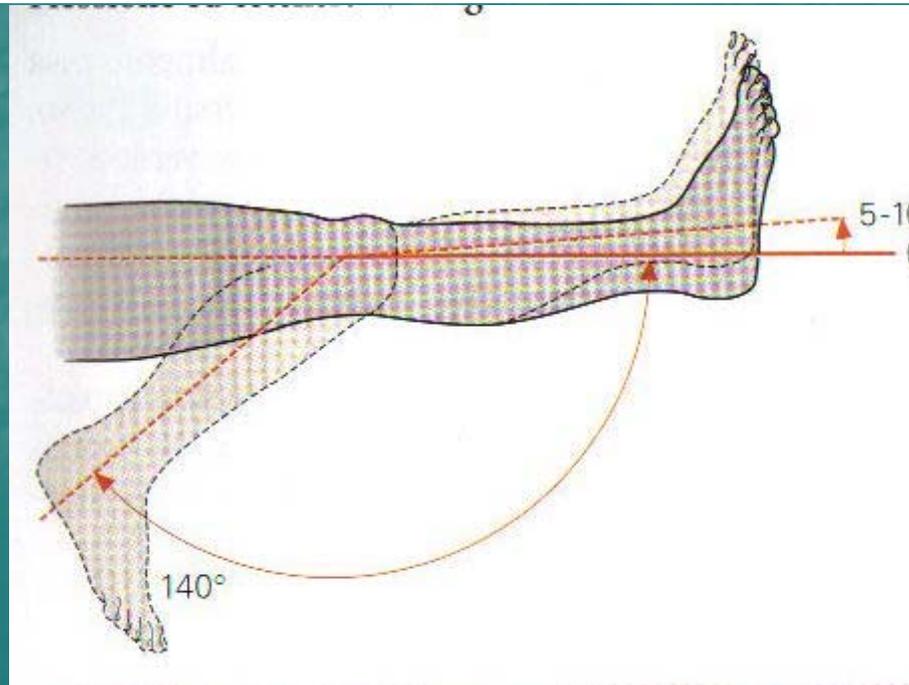

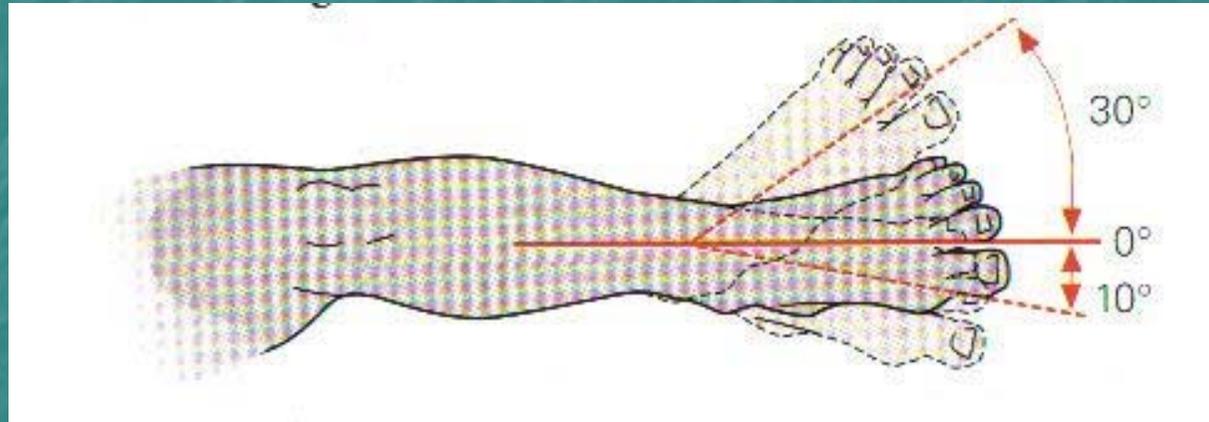

Ginocchio

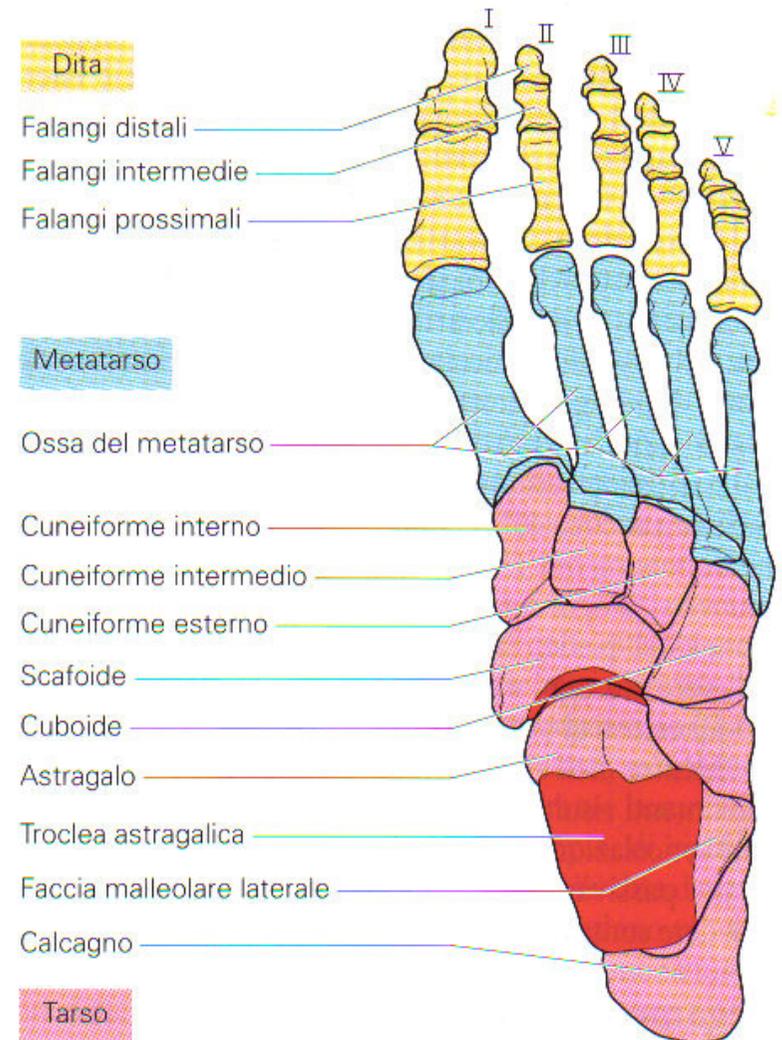

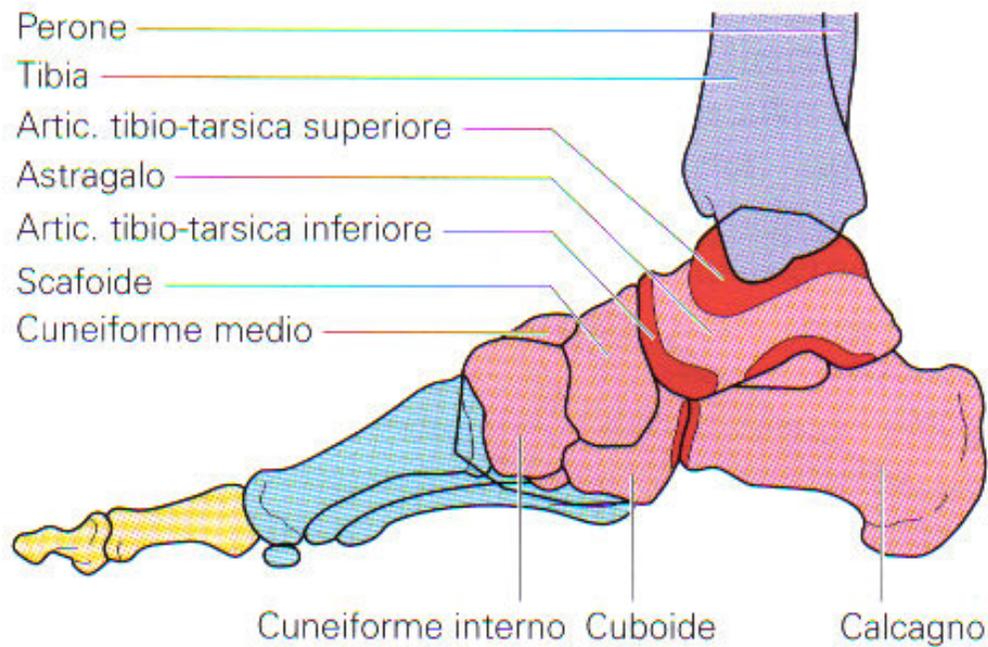

CONDILOARTROSI-ARTRODIA

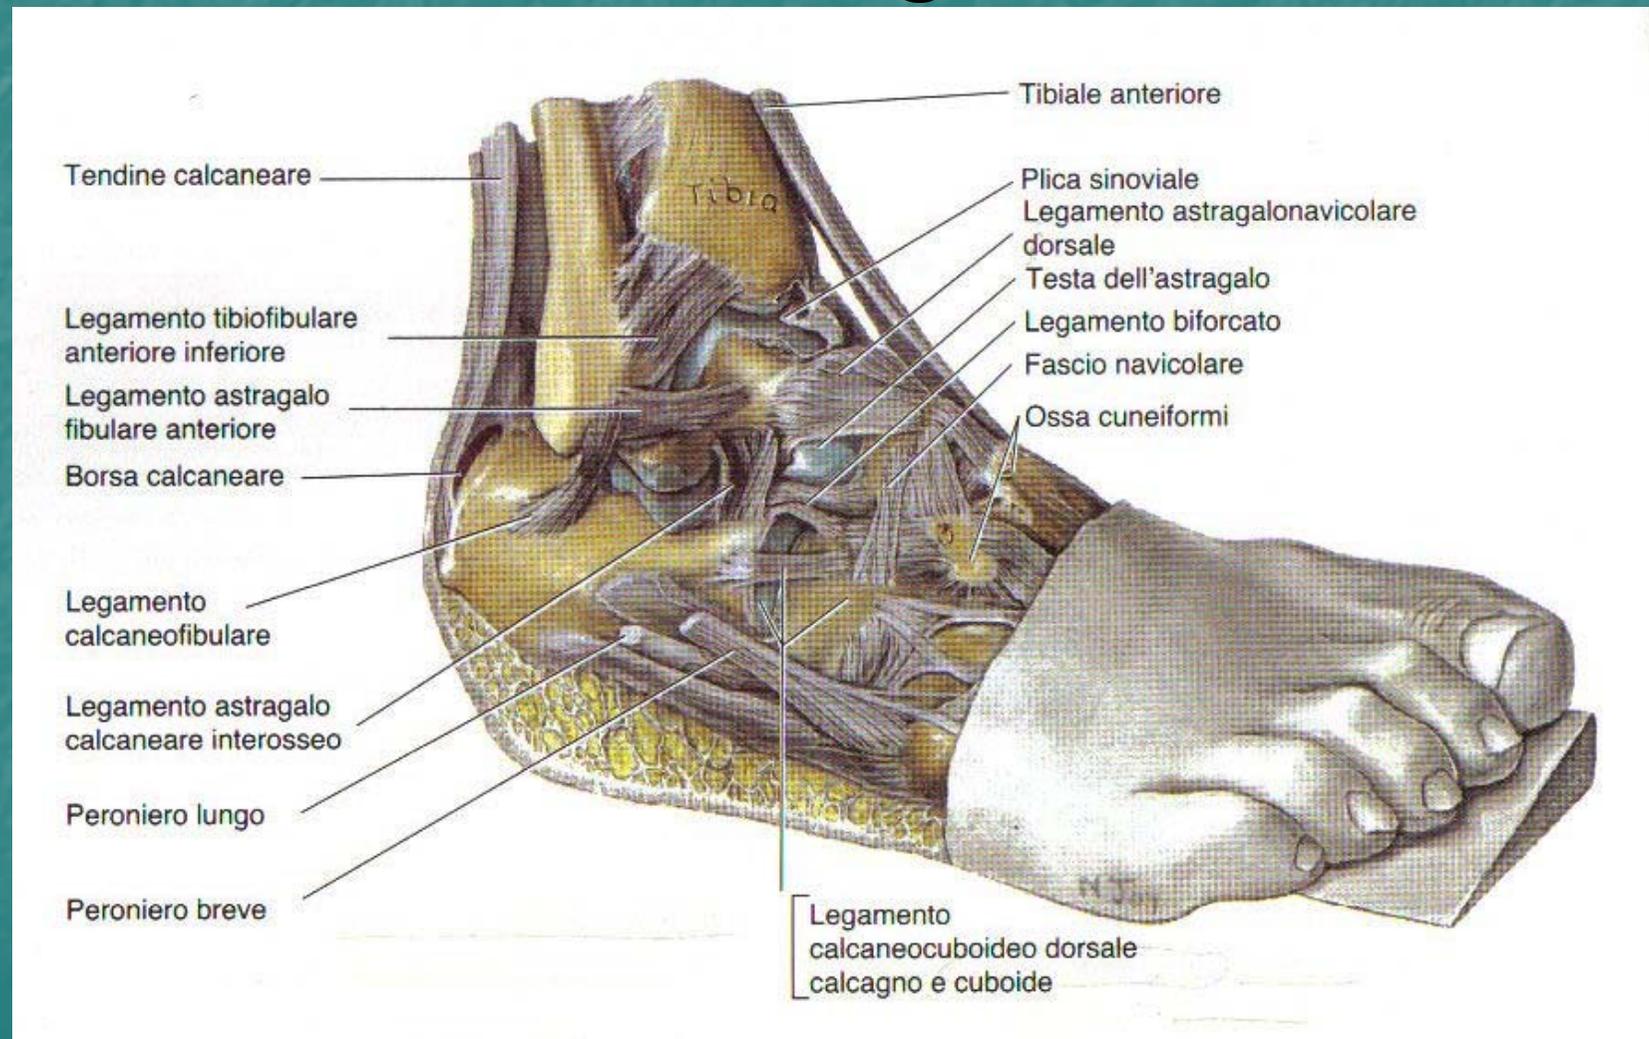

Mobilità

Piede

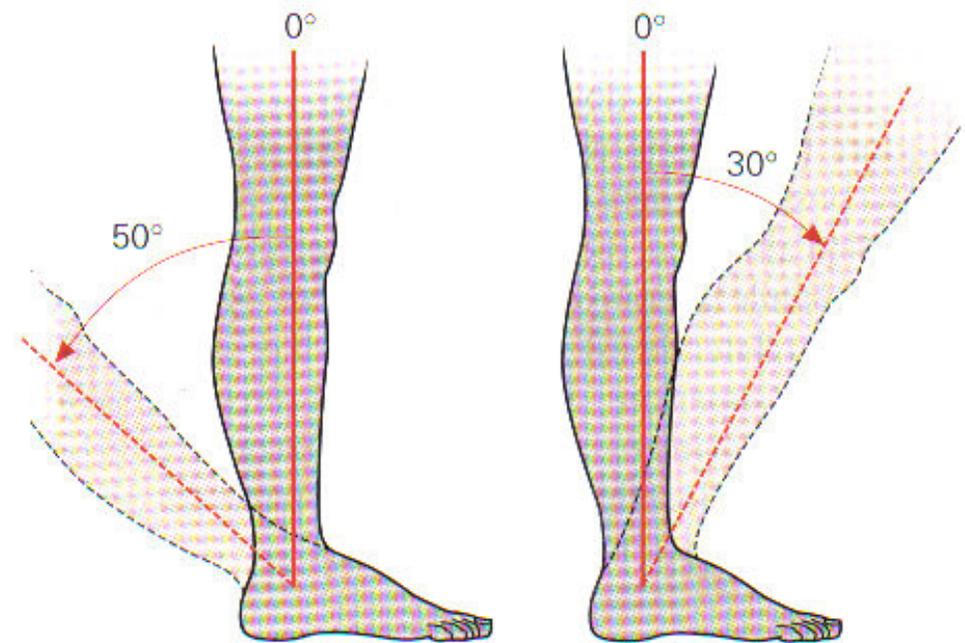

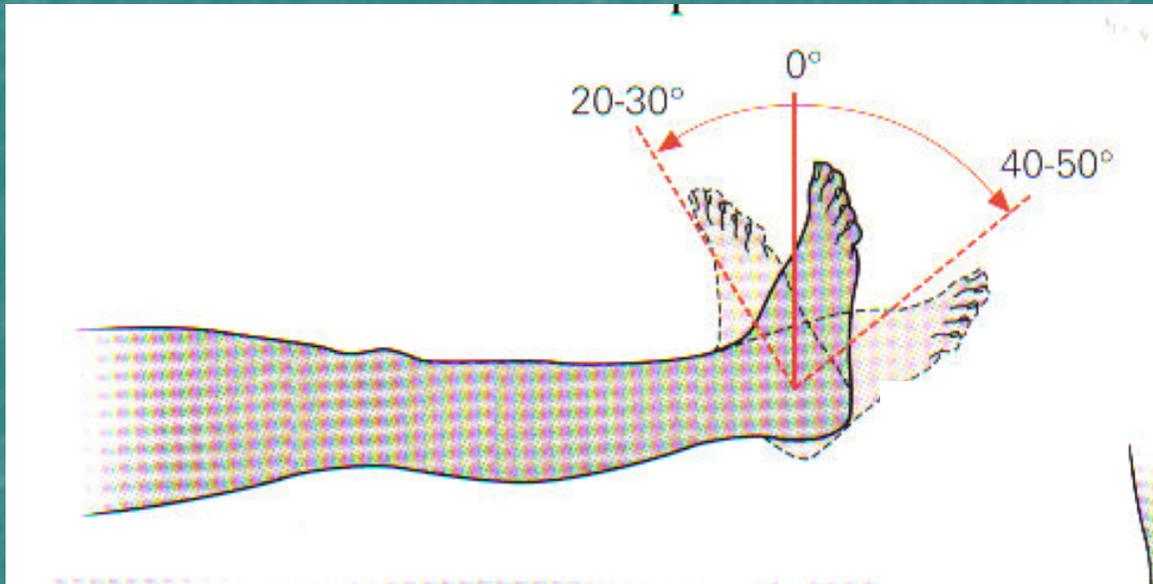

Caviglia

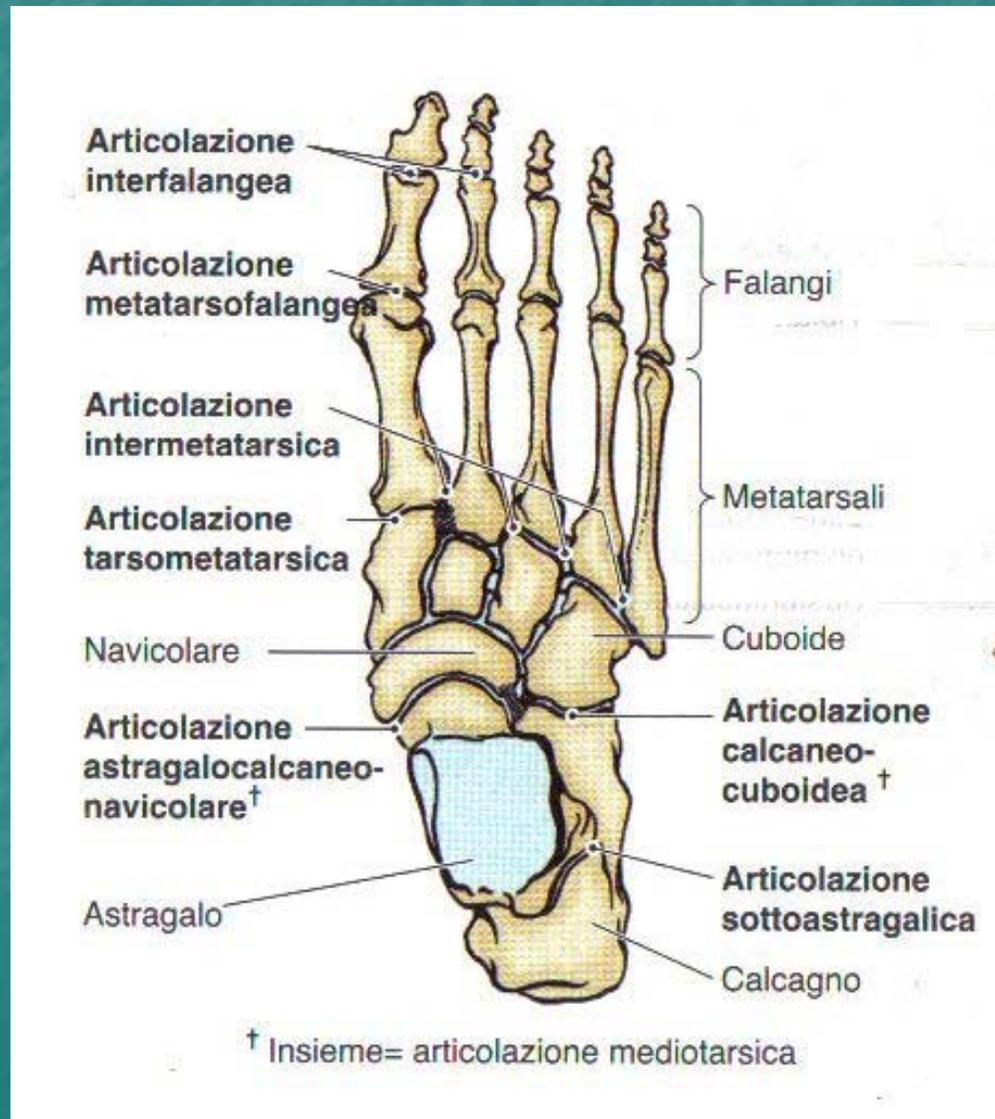

Tibiotrasica: ginglimo angolare

Mobilità della caviglia

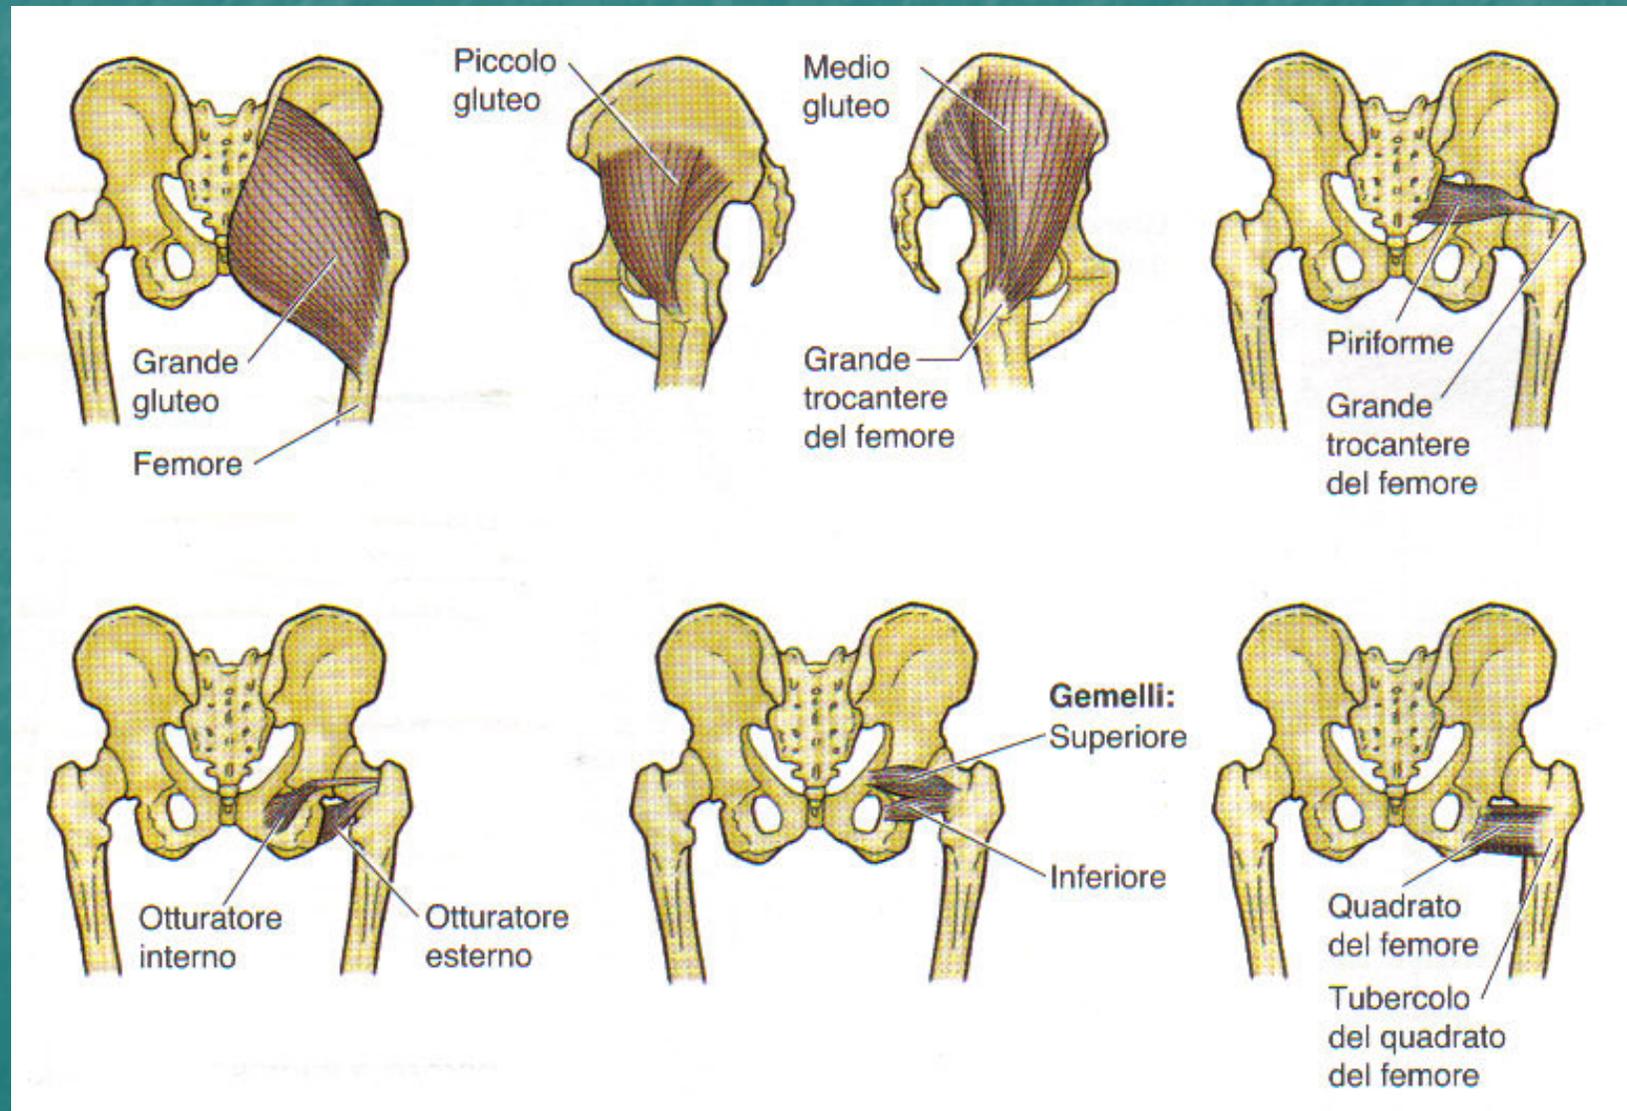

Articolazioni del piede

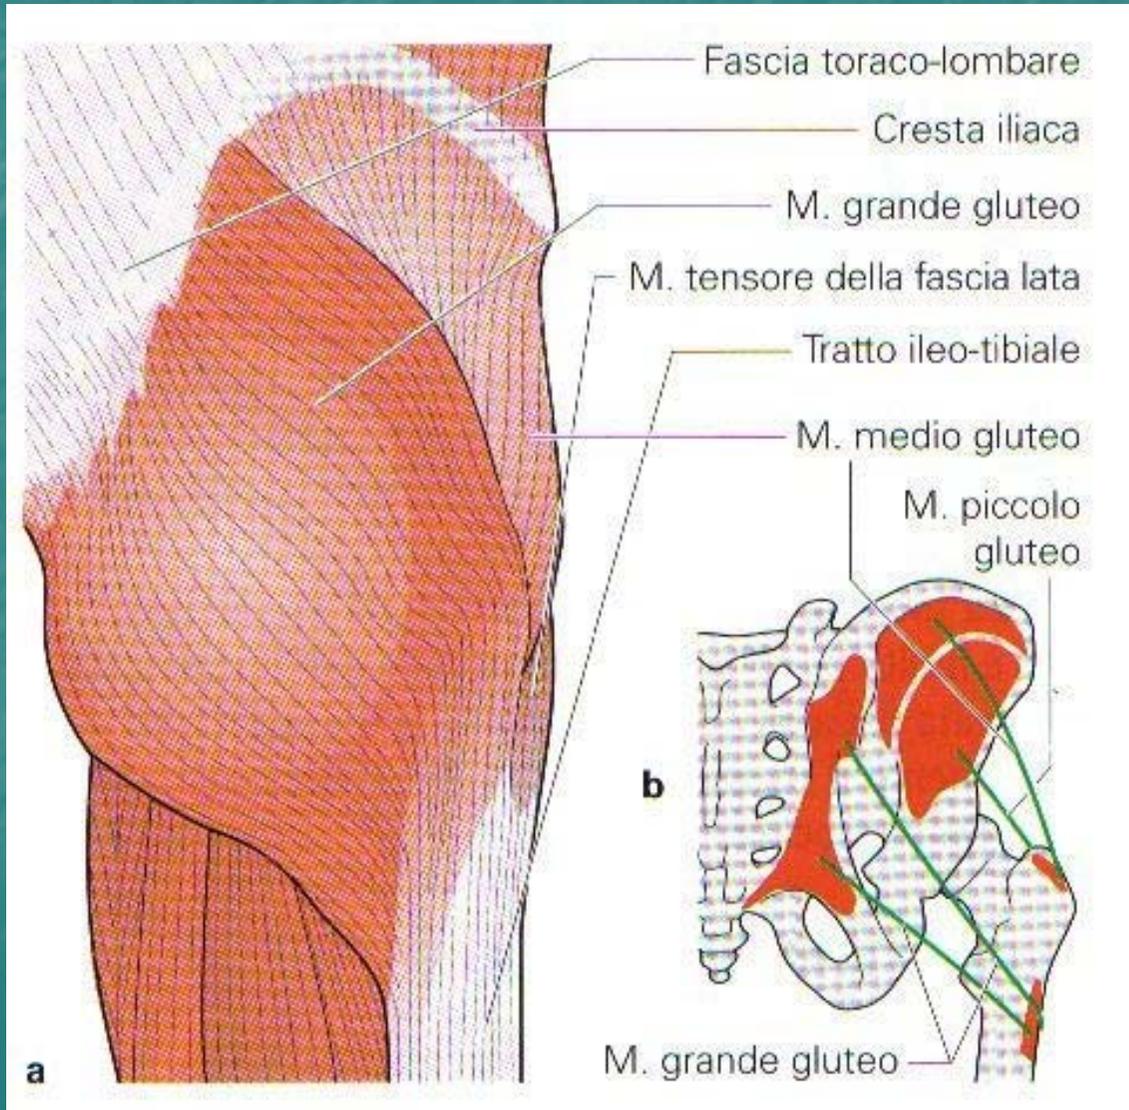

Muscoli dell'anca

- Esterni: grande-medio-piccolo gluteo, piriforme, gemelli sup e inf, otturatori est e int, quadrato del femore
- Interni: ileopsoas, piccolo psoas

Regione glutea

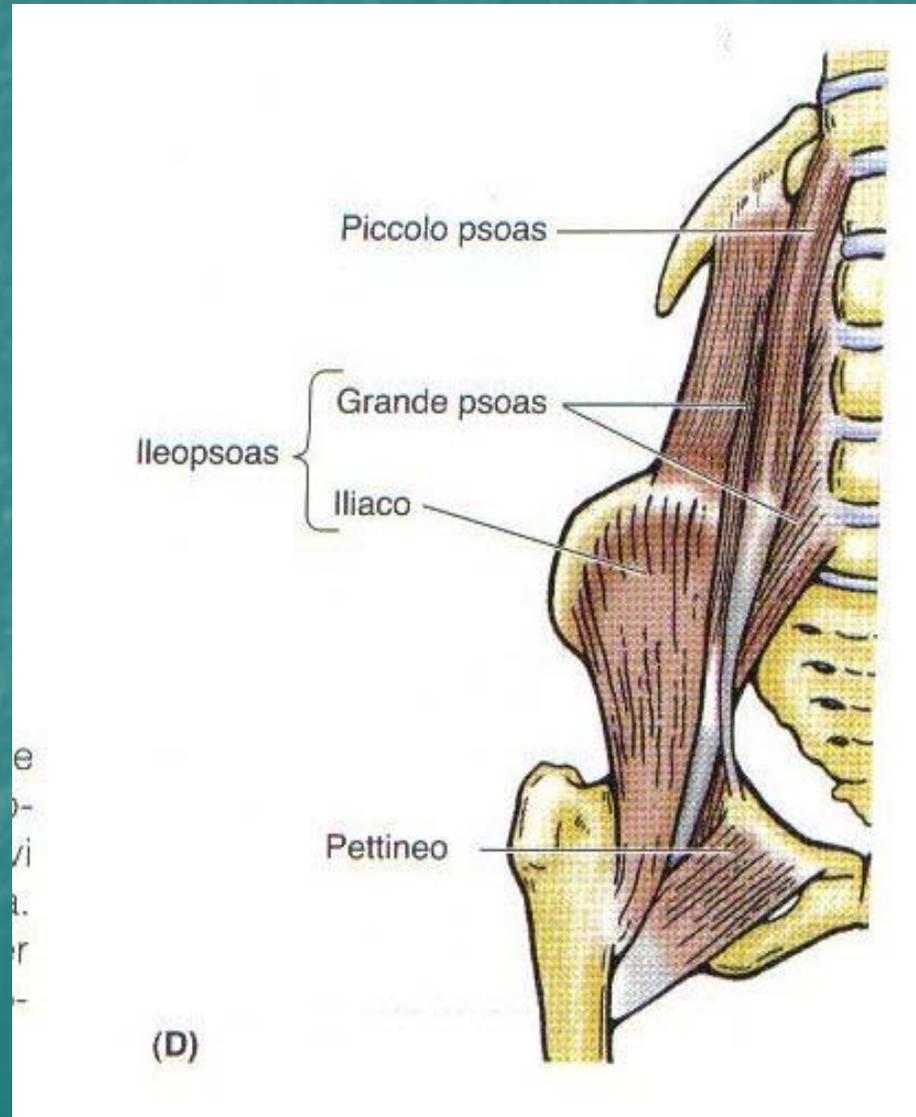

Azioni glutei

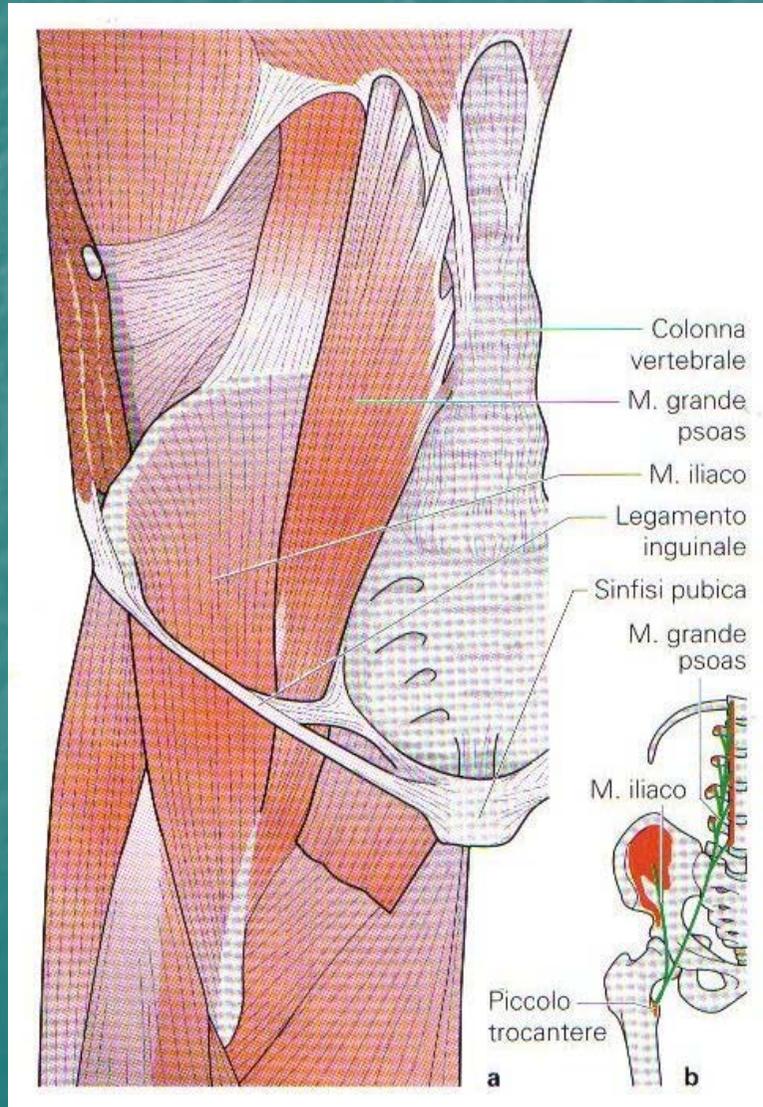

ANCA

- Estensione
- Abduzione
- rotazione

Muscoli anca interna

Muscoli anca interna

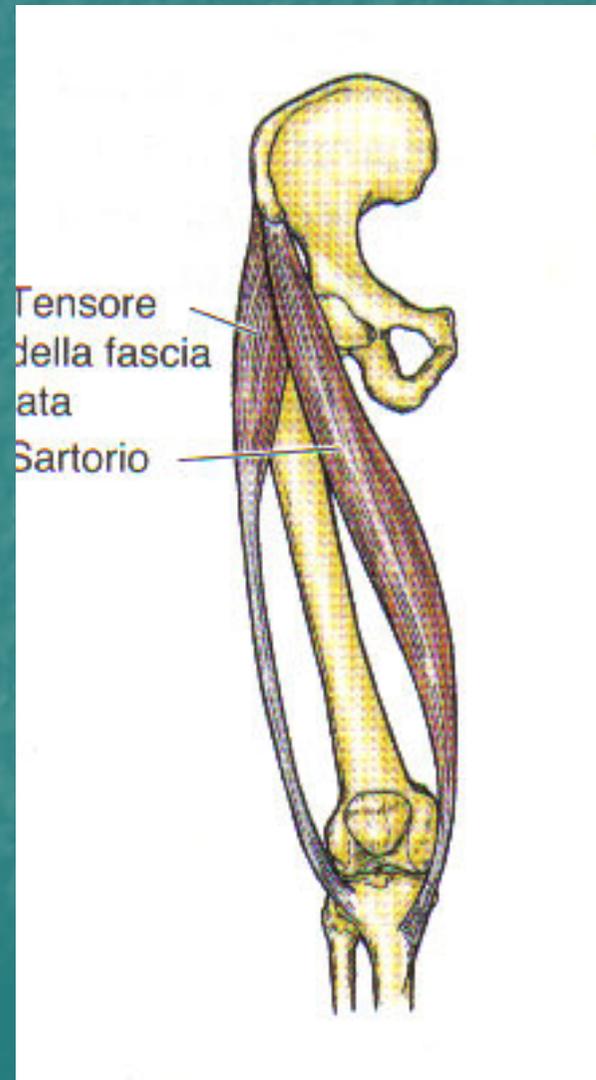

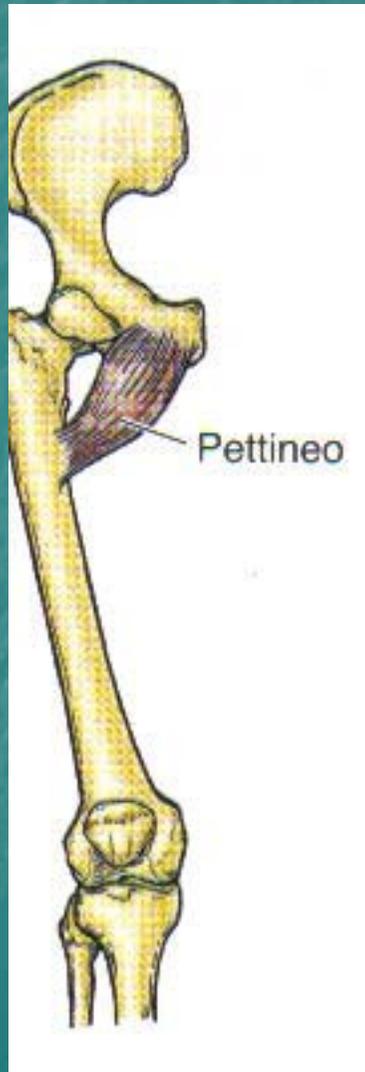

Flessione dell'anca

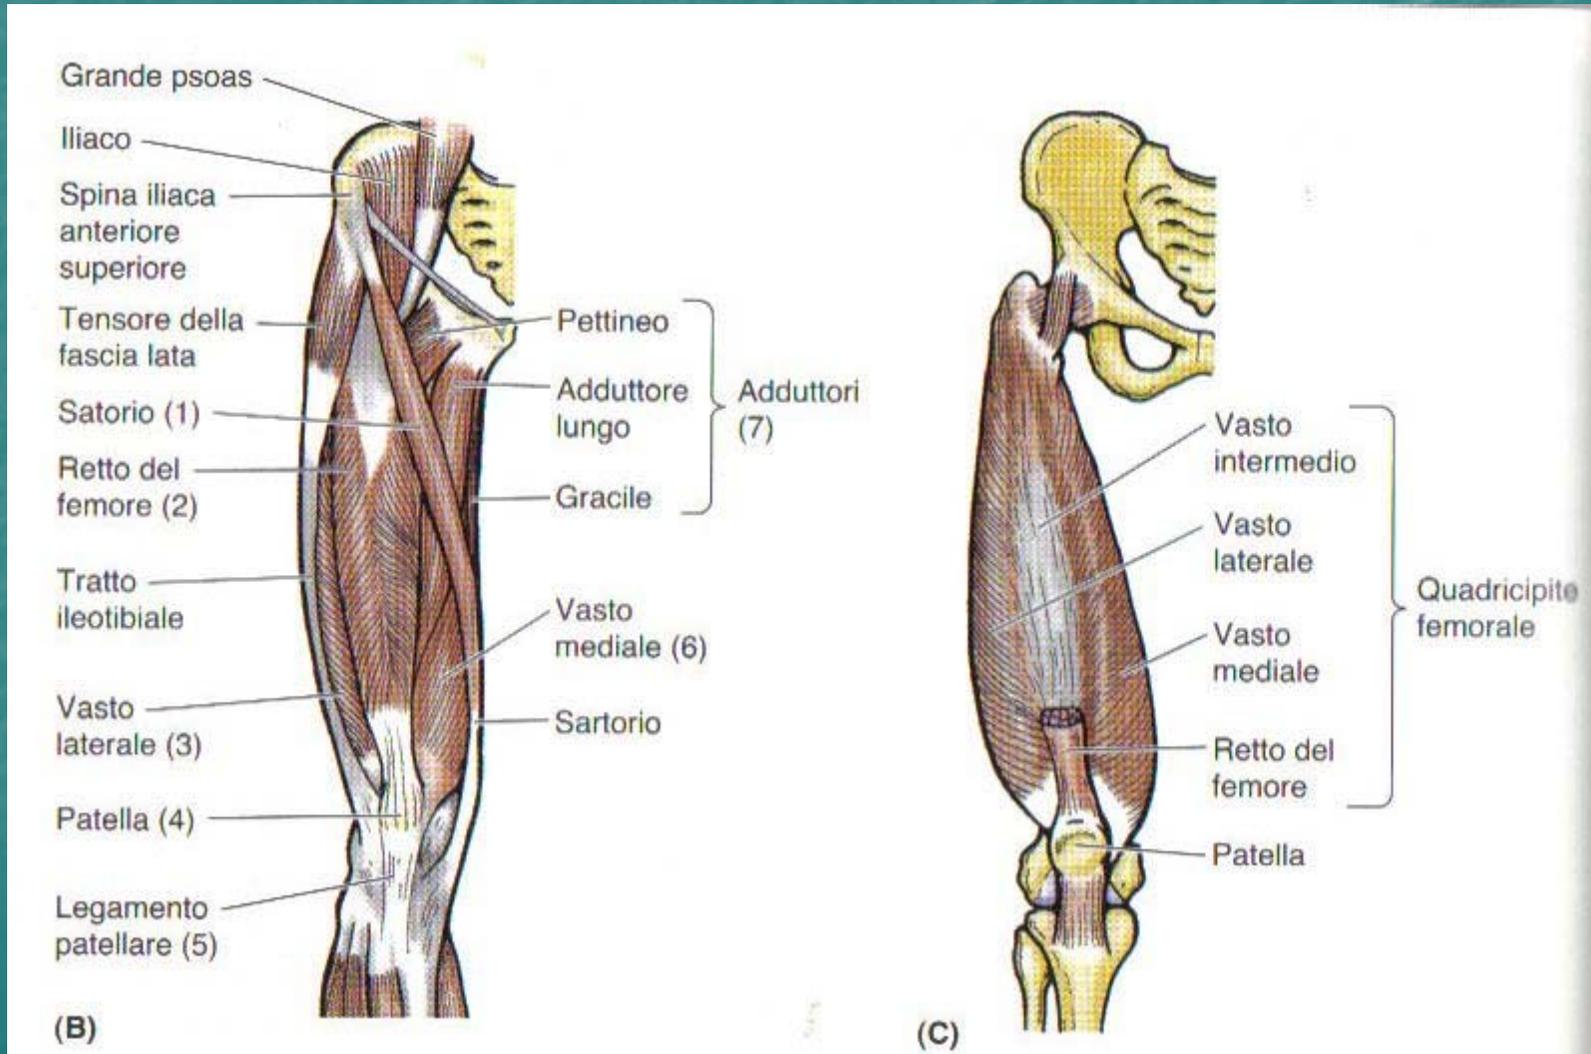

Muscoli della coscia

- Anteriori: tensore della fascia lata, sartorio, quadricipite
- Mediali: gracile, pettineo, adduttori (lungo, breve, grande)
- Posteriori: bicipite femorale, semitendinoso, semimembranoso

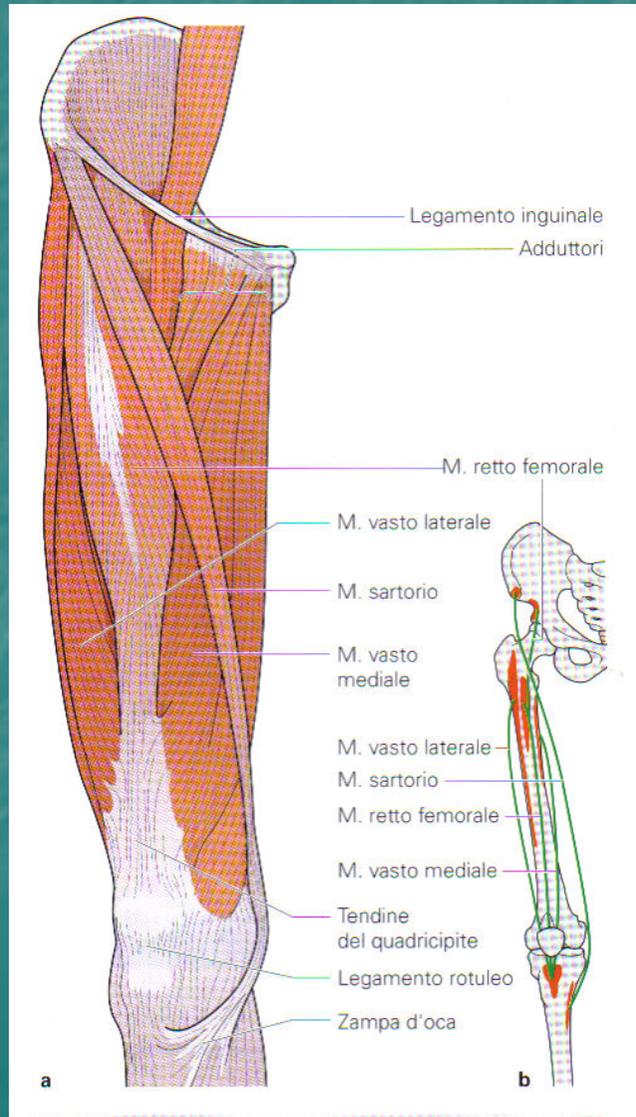

Muscoli anteriori della coscia

Quadricipite femorale

Quadricipite femorale

Estensione
Della gamba

Muscoli mediali coscia

Adduttore lungo

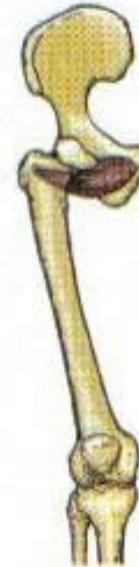

Adduttore breve

Adduttore grande

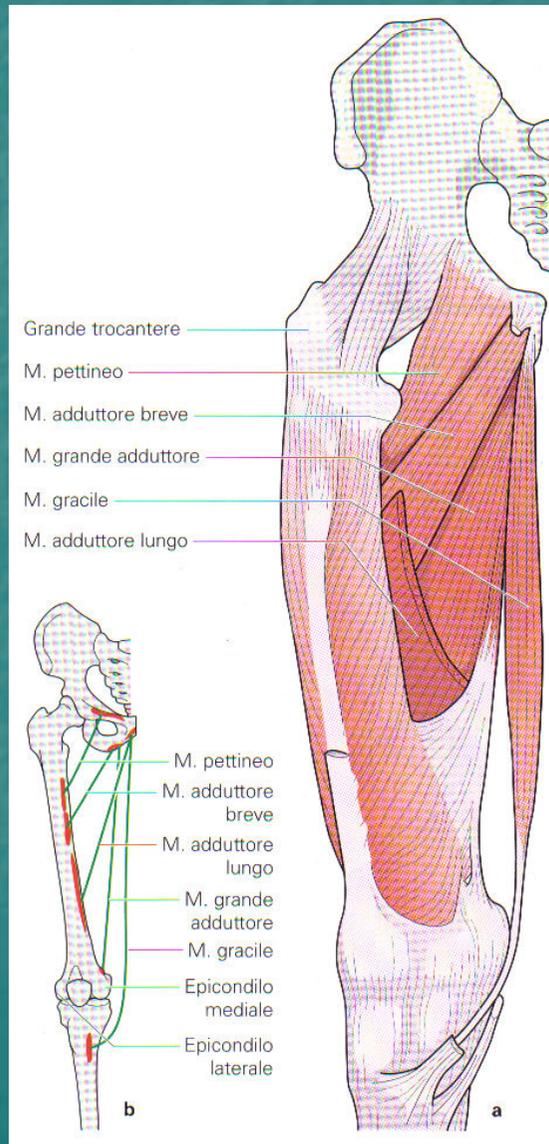

Gracile

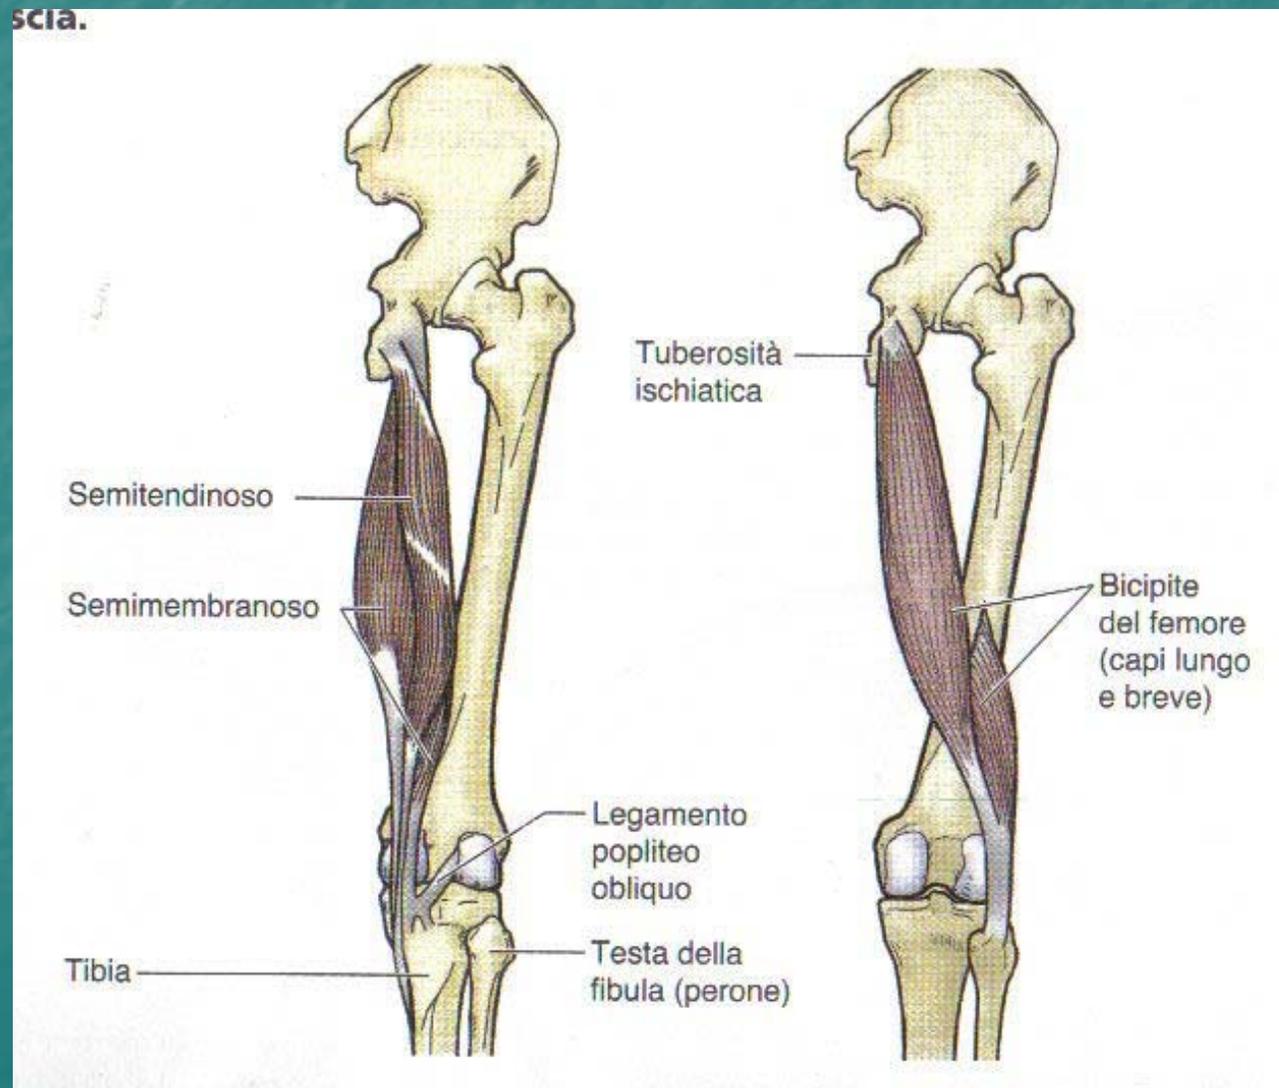

Otturatore esterno

anca

Muscoli posteriori della coscia

Muscoli posteriori della coscia

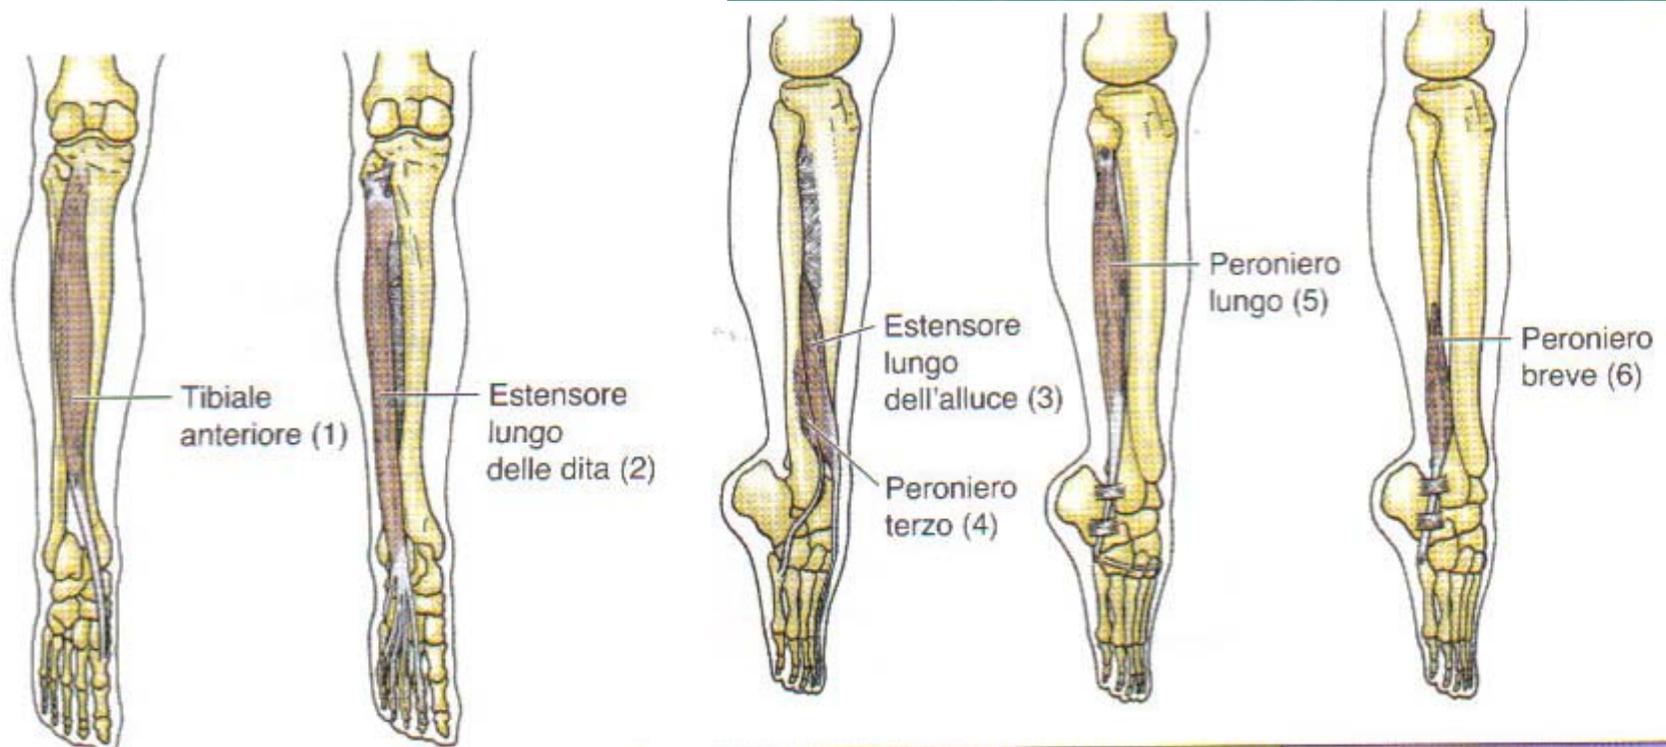

FLESSIONE GAMBA

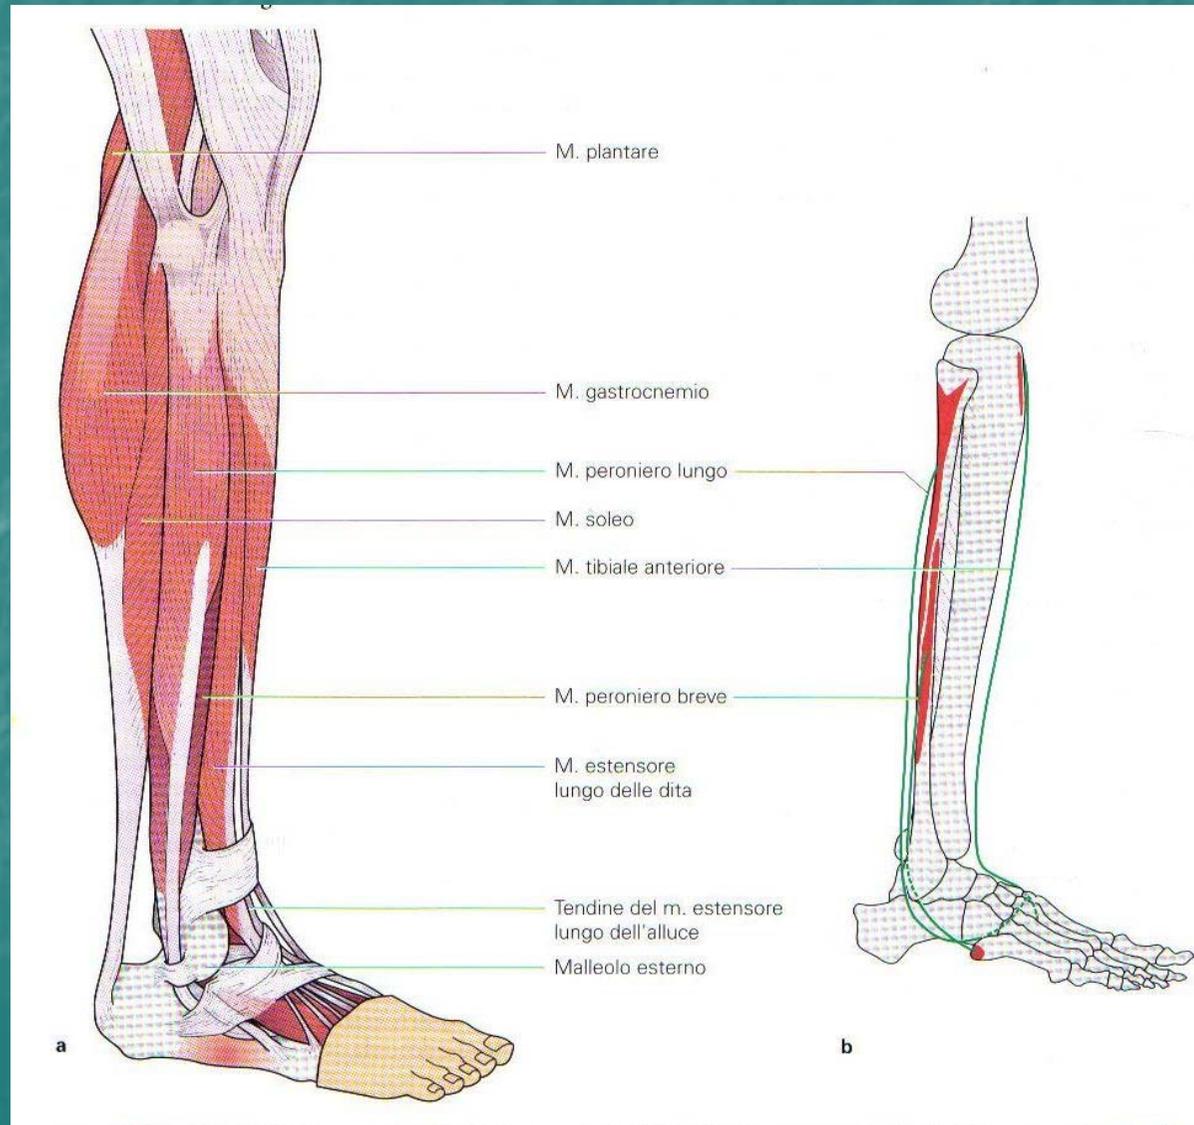

Muscoli della gamba

- Anteriori: tibiale anteriore, estensore lungo delle dita, estensore lungo dell'alluce, peroniero anteriore
- Laterali: peroniero lungo e breve
- Posteriori: tricipite della sura (gastrocnemio+soleo), plantare, popliteo, lessore lungo delle dita, flessore lungo dell'alluce, tibiale posteriore

Muscoli anteriori e laterali della gamba

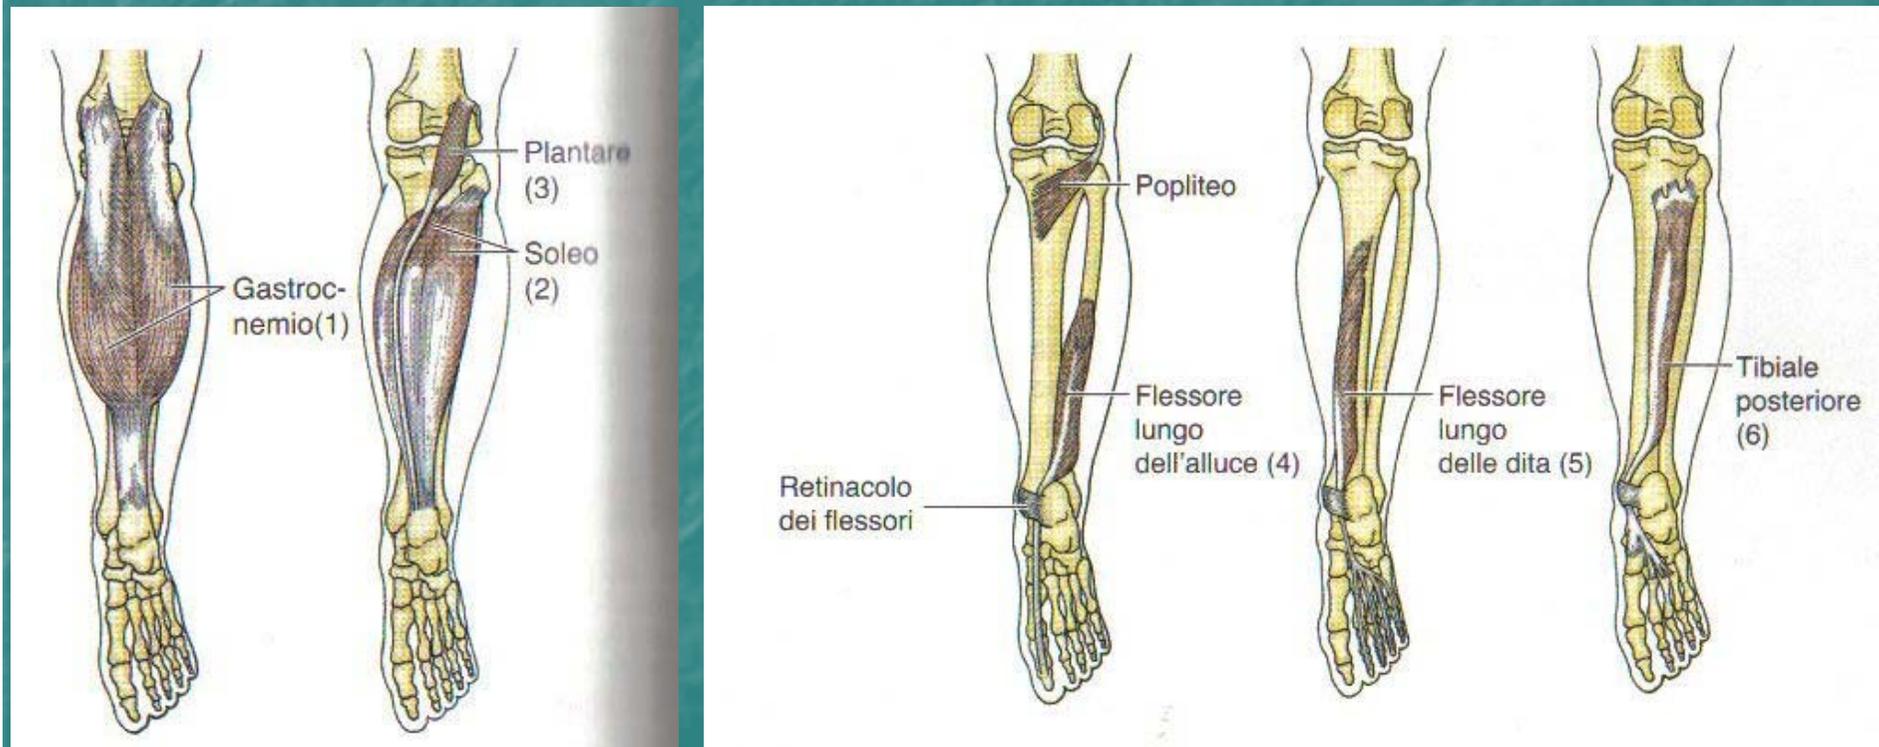

Muscoli anteriori e laterali della gamba

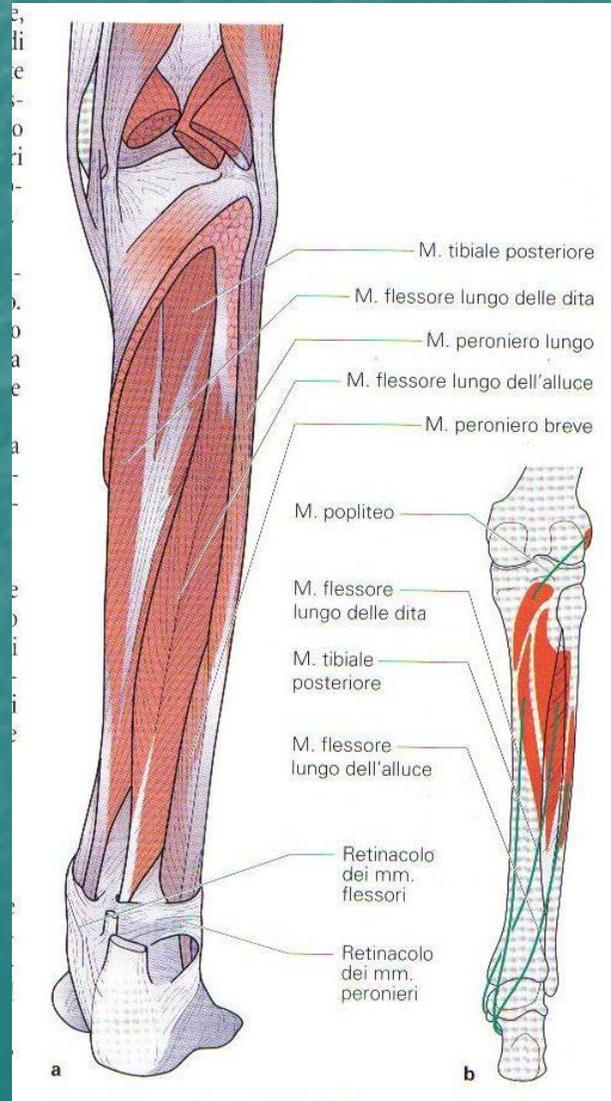

Flessione dorsale piede,
estensione gamba

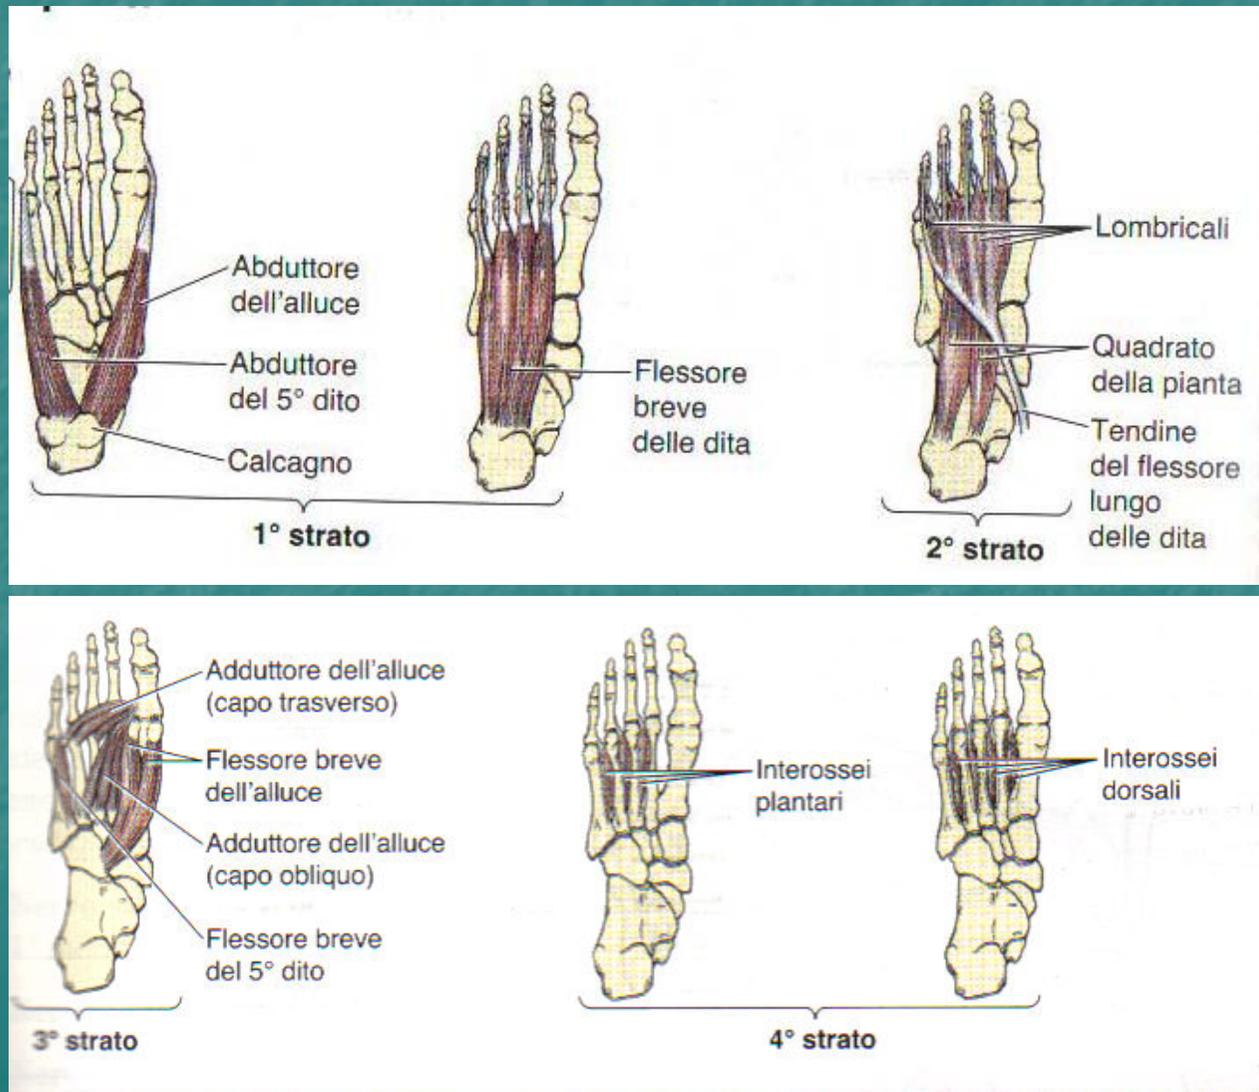

Muscoli posteriori della gamba

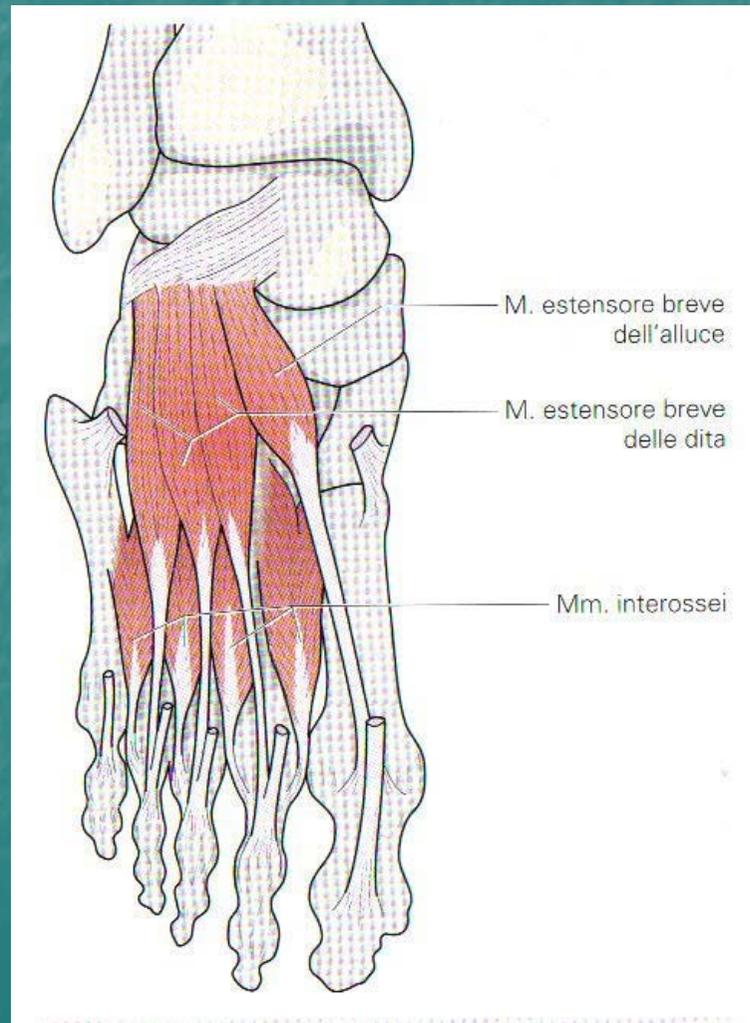

Muscoli posteriori della gamba

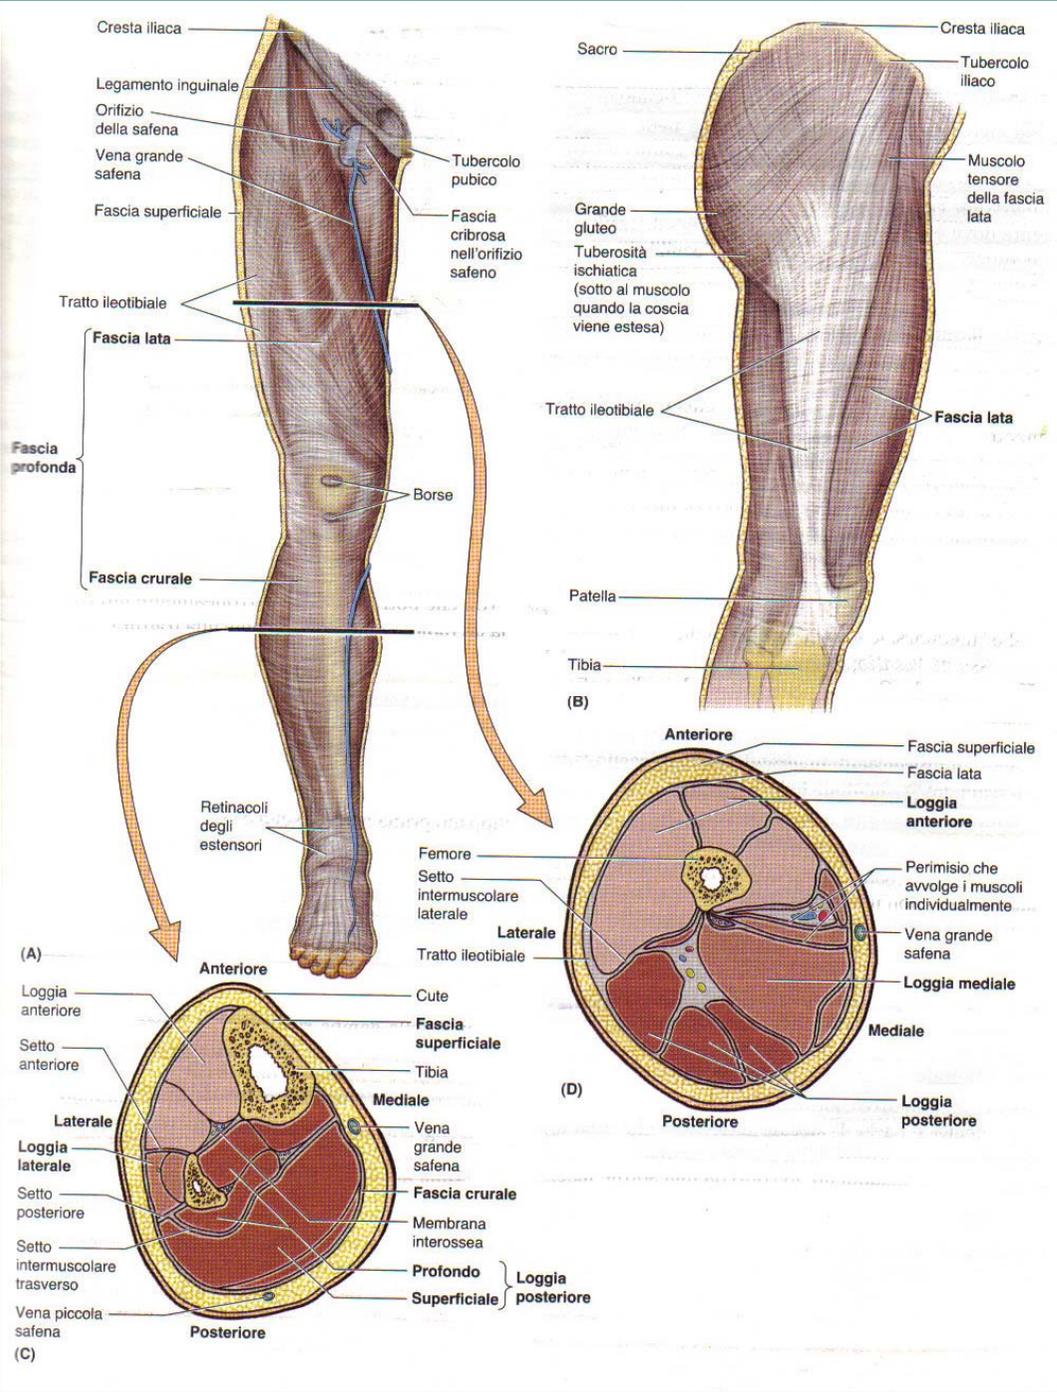

Muscoli della pianta del piede

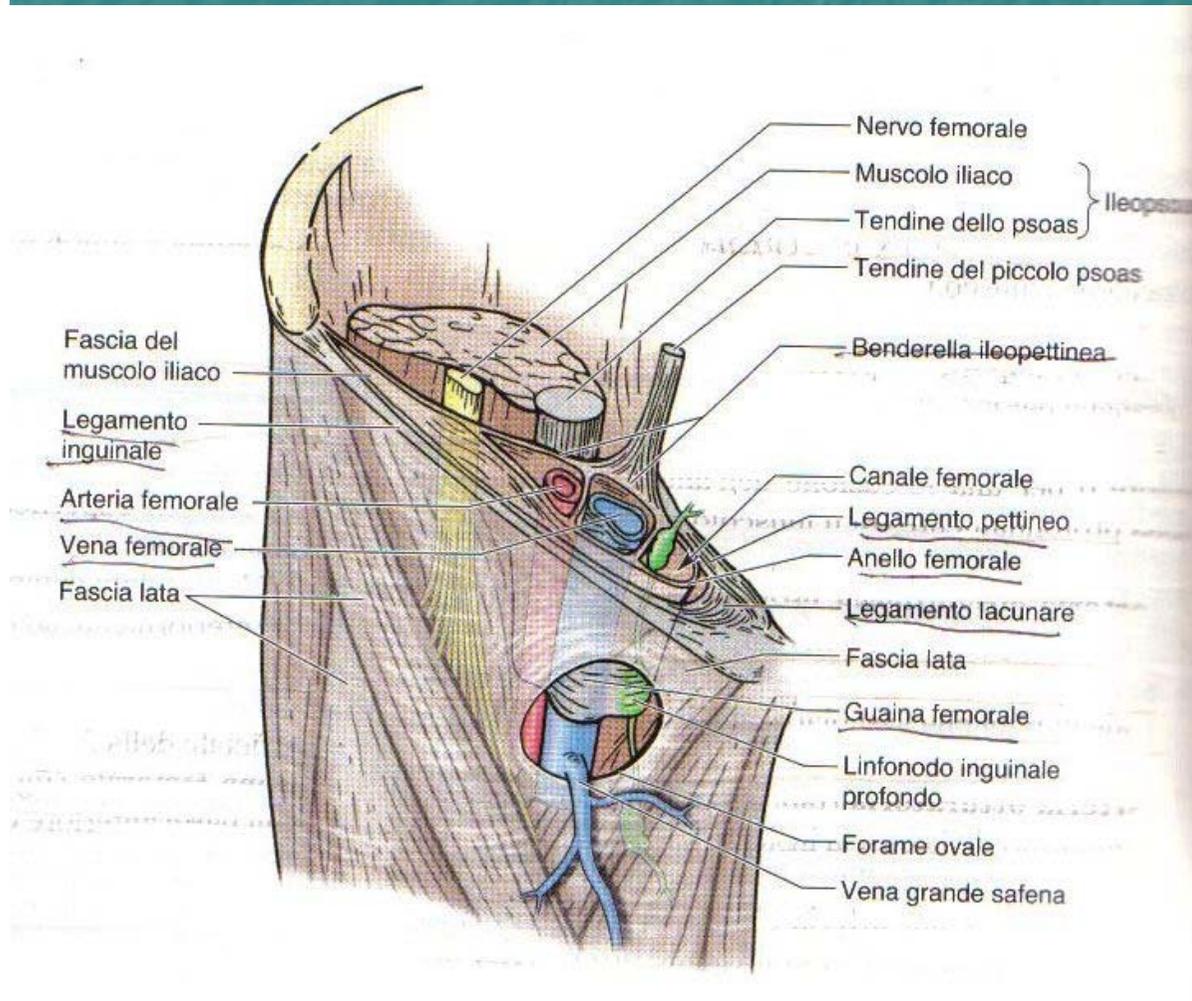

Muscoli del dorso del piede

Fasce

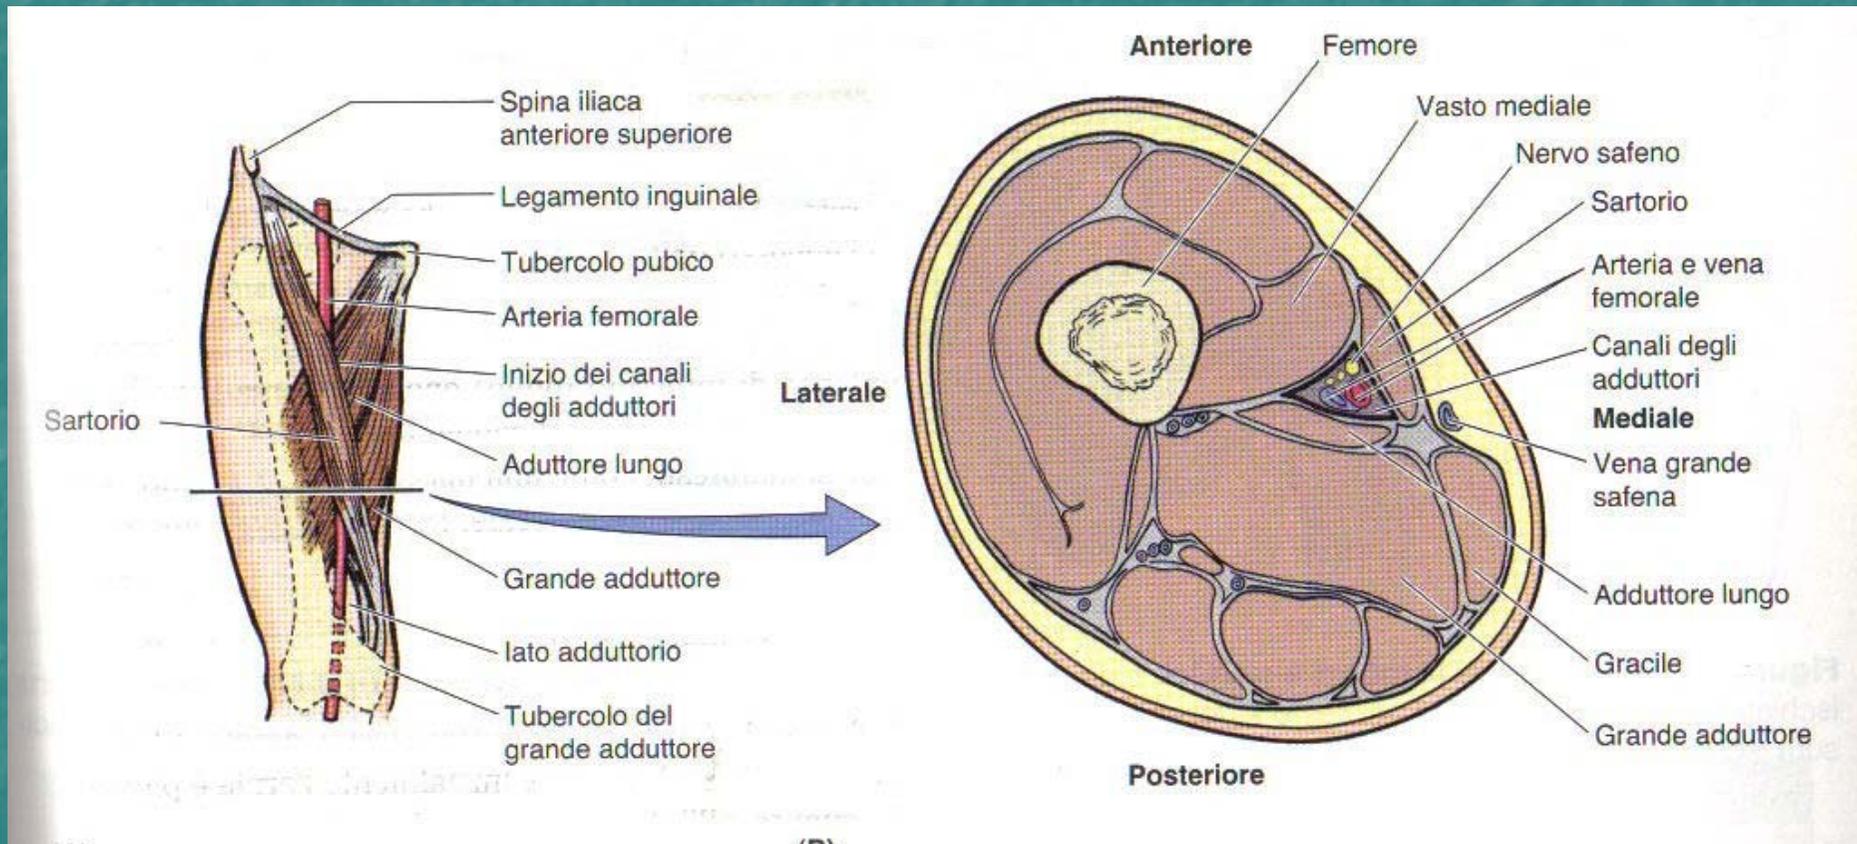

Guaina femorale

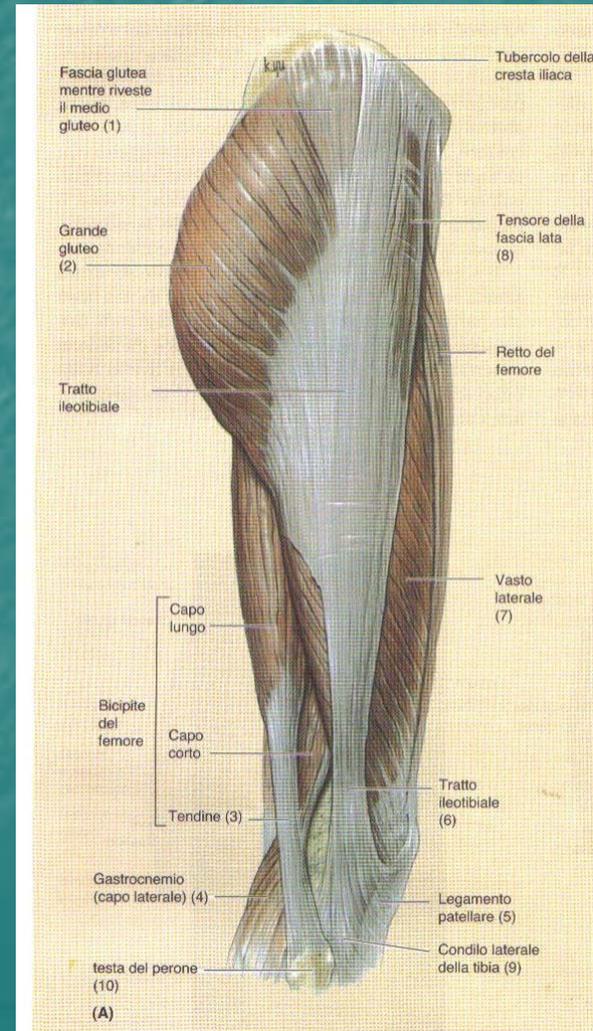

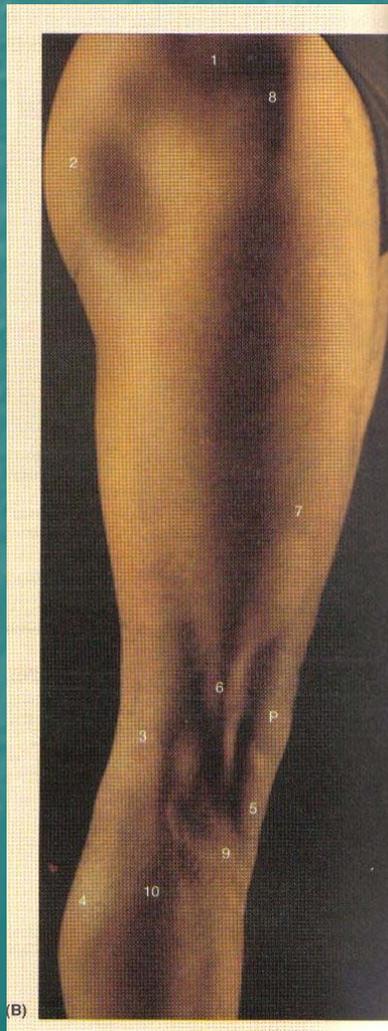

- Compartimento lat-med-intermedio
- Triangolo di scarpa:
 - leg. inguinale
 - sartorio
 - adduttore lungo

Canale degli adduttori

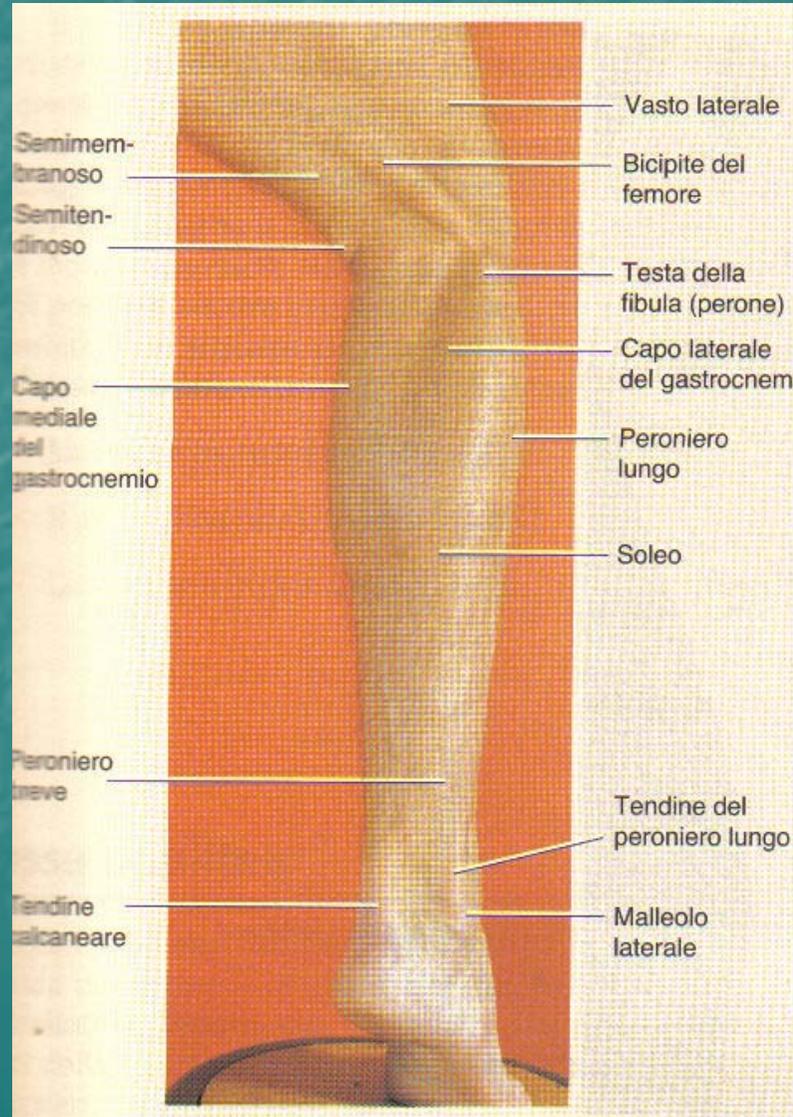

Contiene arteria e vena femorale, nervo safeno
